## Changes in This Release for Oracle Universal Connection Pool Developer's Guide

---

Changes in Oracle Database 23ai	xi
---------------------------------	----

## 1 Introduction to UCP

---

1.1 Overview of Connection Pool	1-1
1.2 Benefits of Using a Connection Pool	1-1
1.3 Overview of Universal Connection Pool	1-2
1.3.1 Conceptual Architecture	1-2
1.3.2 Connection Pool Properties	1-3
1.3.3 Connection Pool Manager	1-3
1.3.4 High Availability and Performance Scenarios	1-3

## 2 Getting Started

---

2.1 Requirements for using UCP	2-1
2.2 Basic Connection Steps in UCP	2-1
2.2.1 Authentication in UCP	2-2
2.2.2 Authentication Using IAM Database Access Tokens in Oracle Cloud Infrastructure	2-2
2.3 UCP API Overview	2-3
2.4 UCP System Properties	2-3
2.5 Basic Connection Example Using UCP	2-4
2.6 Minimal Pool configuration	2-5

## 3 Getting Database Connections in UCP

---

3.1	About Borrowing Connections from UCP	3-1
3.1.1	Overview of Borrowing Connections from UCP	3-1
3.1.1.1	Connection Creation Using Background Threads	3-2
3.1.2	Using the Pool-Enabled Data Source	3-2
3.1.3	Using the Pool-Enabled XA Data Source	3-4
3.1.4	Setting Connection Properties	3-4
3.1.5	Using JNDI to Borrow a Connection	3-5
3.1.6	About Connection Initialization Callback	3-6
3.1.6.1	Overview of Connection Initialization Callback	3-6
3.1.6.2	Creating an Initialization Callback	3-6
3.1.6.3	Registering an Initialization Callback	3-7
3.1.6.4	Removing or Unregistering an Initialization Callback	3-7
3.2	Setting Connection Pool Properties for UCP	3-7
3.3	Overview of Validating Connections in UCP	3-8
3.3.1	Validating When Borrowing	3-8
3.3.2	Minimizing Connection Validation with <code>setSecondsToTrustIdleConnection()</code> Method	3-9
3.3.3	Checking If a Connection Is Valid	3-9
3.4	Returning Borrowed Connections to UCP	3-10
3.5	Removing Connections from UCP	3-11
3.6	UCP Integration with Third-Party Products	3-11

## 4 Connection Creation Consumer

---

4.1	Implementing a Connection Creation Consumer	4-1
-----	---	-----

## 5 Optimizing Universal Connection Pool Behavior

---

5.1	Optimizing Connection Pools	5-1
5.2	About Controlling the Pool Size in UCP	5-2
5.2.1	Setting the Initial Pool Size	5-2
5.2.2	Setting the Minimum Pool Size	5-2
5.2.3	Setting the Maximum Pool Size	5-3
5.2.4	Setting the Minimum Idle Connection Number	5-3
5.3	About Optimizing Real-World Performance with Static Connection Pools	5-4
5.4	Stale Connections in UCP	5-5
5.4.1	What is Connection Reuse?	5-5
5.4.1.1	Setting the Maximum Connection Reuse Time	5-5
5.4.1.2	Setting the Maximum Connection Reuse Count	5-6
5.4.2	Setting the Connection Validation Timeout	5-6
5.4.3	Setting the Abandon Connection Timeout	5-7

5.4.4	Setting the Time-To-Live Connection Timeout	5-7
5.4.5	Setting the Connection Wait Timeout	5-8
5.4.6	Setting the Inactive Connection Timeout	5-8
5.4.7	Setting the Query Timeout	5-9
5.4.8	Setting the Timeout Check Interval	5-9
5.5	About Harvesting Connections in UCP	5-9
5.5.1	Overview of Harvesting Connections in UCP	5-10
5.5.2	Setting a Connection to Harvestable	5-10
5.5.3	Setting the Harvest Trigger Count	5-10
5.5.4	Setting the Harvest Maximum Count	5-11
5.6	About Caching SQL Statements in UCP	5-11
5.6.1	Overview of Statement Caching in UCP	5-11
5.6.2	Enabling Statement Caching in UCP	5-12
5.7	UCP Best Practices	5-12

## 6 Labeling Connections in UCP

---

6.1	Overview of Labeling Connections in UCP	6-1
6.2	Implementation of a Labeling Callback in UCP	6-2
6.2.1	When to Use a Labeling Callback in UCP	6-2
6.2.2	Creating a Labeling Callback in UCP	6-2
6.2.2.1	Example of Labeling Callback in UCP	6-3
6.2.3	Registering a Labeling Callback in UCP	6-4
6.2.4	Removing a Labeling Callback in UCP	6-5
6.3	Integration of UCP with DRCP	6-5
6.4	Applying Connection Labels in UCP	6-5
6.5	Borrowing Labeled Connections from UCP	6-6
6.6	Checking Unmatched Labels in UCP	6-6
6.7	Removing a Connection Label in UCP	6-7

## 7 Controlling Reclaimable Connection Behavior

---

7.1	AbandonedConnectionTimeoutCallback Interface	7-1
7.2	TimeToLiveConnectionTimeoutCallback Interface	7-1

## 8 Using the Connection Pool Manager

---

8.1	Overview of Using the UCP Manager	8-1
8.1.1	About Connection Pool Manager	8-1
8.1.2	Creating a Connection Pool Manager for UCP	8-1
8.1.3	Life Cycle States of a Connection	8-1
8.1.3.1	Creating a Connection Pool	8-2

8.1.3.2	Starting a Connection Pool	8-3
8.1.3.3	Stopping a Connection Pool	8-3
8.1.3.4	Destroying a Connection Pool	8-3
8.1.4	Maintenance of Universal Connection Pool	8-4
8.1.4.1	Refreshing a Connection Pool	8-4
8.1.4.2	Recycling a Connection Pool	8-4
8.1.4.3	Purging a Connection Pool	8-5
8.2	Overview of JMX-Based Management in UCP	8-5
8.2.1	UniversalConnectionPoolManagerMBean	8-6
8.2.2	UniversalConnectionPoolMBean	8-6

## 9 Shared Pool Support for Multitenant Data Sources

---

9.1	Overview of Shared Pool Support	9-1
9.2	Prerequisites for Supporting Shared Pool	9-5
9.3	Configuring the Shared Pool	9-6
9.4	UCP APIs for Shared Pool Support	9-7
9.5	Sample XML Configuration File for Shared Pool	9-8

## 10 Using Oracle RAC Features

---

10.1	Overview of Oracle RAC Features	10-1
10.2	About Fast Connection Failover	10-2
10.2.1	Overview of Fast Connection Failover	10-2
10.2.2	What is Fast Connection Failover?	10-4
10.2.2.1	What the Application Sees	10-4
10.2.2.2	How FCF Works	10-4
10.2.3	Fast Connection Failover Prerequisites	10-5
10.2.4	Example of Fast Connection Failover Configuration	10-5
10.2.5	Enabling Fast Connection Failover	10-6
10.2.6	What is ONS?	10-7
10.2.6.1	Overview of ONS Configuration File	10-7
10.2.6.2	Remote Configuration of ONS	10-9
10.2.6.3	Configuration of Client-Side ONS Daemon	10-10
10.2.7	Configuring the Connection URL	10-12
10.3	About Run-Time Connection Load Balancing	10-13
10.3.1	Overview of Run-Time Connection Load Balancing	10-13
10.3.2	Setting Up Run-Time Connection Load Balancing	10-14
10.4	About Connection Affinity	10-15
10.4.1	Overview of Connection Affinity	10-15
10.4.1.1	Transaction-Based Affinity	10-16
10.4.1.2	Web Session Affinity	10-16

10.4.1.3	Oracle RAC Data Affinity	10-16
10.4.2	Setting Up Connection Affinity	10-17
10.4.2.1	Creating a Connection Affinity Callback	10-18
10.4.2.2	Registering a Connection Affinity Callback	10-19
10.4.2.3	Removing a Connection Affinity Callback	10-19
10.4.2.4	Strict Affinity Mode	10-19
10.5	Global Data Services	10-20
10.5.1	Overview of Global Data Services	10-20
10.5.2	Configuring an Application for Using GDS	10-20

## 11 UCP Asynchronous Extension

---

11.1	Overview of UCP Asynchronous Extension	11-1
11.2	Example: UCP Asynchronous Extension	11-2
11.3	Asynchronous Connection Labeling	11-3
11.4	Example: Asynchronous Connection Labeling	11-4

## 12 Ensuring Application Continuity

---

12.1	Overview of Ensuring Application Continuity with UCP	12-1
12.2	Configuring the Data Source for Application Continuity	12-1
12.3	Using Connection Labeling for Application Continuity	12-2
12.4	Using Connection Initialization Callback for Application Continuity	12-2

## 13 Shared Pool for Sharded Databases

---

13.1	Overview of UCP Shared Pool for Database Sharding	13-1
13.2	About Handling Connection Requests for a Sharded Database	13-2
13.2.1	How to Checkout Connections from a Pool with a Sharding Key	13-3
13.2.2	About Configuring the Number of Connections Per Shard	13-4
13.2.3	About Connecting to the Shard Catalog or Co-ordinator for Multishard Queries	13-4
13.3	Sharding Data Source for Transparent Access to Sharded Databases	13-5
13.3.1	Support for Single Shard Transactions	13-7
13.4	Middle-Tier Routing Using UCP	13-9
13.4.1	Middle-Tier Routing with UCP Example	13-9
13.5	Sharding with JTA/XA Transaction in WebLogic Server	13-10

## 14 Diagnosing a Connection Pool

---

14.1	Pool Statistics	14-1
14.2	Dynamic Monitoring Service Metrics	14-1
14.3	Overview of Logging and Tracing in UCP	14-2

14.3.1	Logging and Tracing Settings	14-2
14.3.2	Diagnosability System Properties and Command Line	14-3
14.3.3	Logging Configuration File	14-3
14.3.4	Tracing the Error Codes to Watch	14-4
14.3.5	MBeans for UCP Diagnosability	14-6
14.4	About Viewing Oracle RAC Statistics	14-6
14.4.1	Fast Connection Failover Statistics	14-7
14.4.2	Run-Time Connection Load Balance Statistics	14-7
14.4.3	Connection Affinity Statistics	14-7
14.5	Exceptions and Error Codes	14-8

## A Error Codes Reference

---

A.1	General Structure of UCP Error Messages	A-1
A.2	Connection Pool Layer Error Messages	A-2
A.3	JDBC Data Sources and Dynamic Proxies Error Messages	A-6

## B UCP Exception Error Codes

---

## Index

---
