

Preface

This document describes how to create and configure CDBs, PDBs, and application containers.

- [Audience](#)
- [Documentation Accessibility](#)
- [Related Documents](#)
- [Conventions](#)

Audience

This document explains how to administer containers as containers, for example, how to create CDBs and PDBs, start them up and shut them down, and perform cross-container operations. Specifically, this document is intended for database administrators who perform the following tasks:

- Create CDBs, PDBs, and application containers
- Relocate, unplug, and plug in PDBs and application containers
- Install and maintain applications in application containers
- Perform cross-container operations

Note:

Oracle Database Administrator's Guide describes traditional administrative tasks that you perform within an existing container, including managing database storage, schema objects, resources, and task scheduling.

To use this document, you must be familiar with relational database concepts. You must also be familiar with the operating system environment under which you are running Oracle Database.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Conventions

The following text conventions are used in this document:

| Convention | Meaning |
|-----------------|----------------------------------------------------------------------------------------------------------------------------------------|
| boldface | Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary. |
| <i>italic</i> | Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values. |
| monospace | Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter. |
