

# Oracle® Database

## Database Administrator's Guide

23ai  
F47036-12  
March 2025

ORACLE®

Contributors: A. Agrawal, L. Ashdown, P. Avril, D. Austin, T. Baby, H. Baer, S. Ball, S. Battula, M. Bauer, T. Bednar, E. Belden, J. Byun, L. Carpenter, A. Chaudhry, C. Chang, B. Cheng, H. Chien, T. Chien, G. Christman, C. C. Chui, L. Clarke, D. Colello, C. Colrain, K. Cook, J. Creighton, A. Dadhich, S. Datta, S. Davidson, M. Dilmán, S. Doraiswamy, J. Draaijer, M. Fallen, M. Fuller, D. Gagne, A. Ganesh, M. Girkar, GP Gongloor, J. Gonzalez, V. Goorah, S. Gopalan, S. Gupta, B. Habeck, S. Hase, W. Hu, P. Huey, K. Inoue, M. Ito, C. Iyer, K. Itikarlapalli, P. Jaganath, S. Jain, C. Jones, S. Joshi, B. Khaladkar, F. Kobylanski, B. Krishnan, V. Krishnaswamy, A. Kruglikov, B. Kuchibhotla, V. Kuhr, R. Kumar, S. Kumar, V. Kumar, H. Lakshmanan, A. Lee, B. Lee, J. Lee, S. K. Lee, T. Lee, C. Lei, B. Leung, Y. Li, I. Listvinsky, B. Llewellyn, H. Lombera, B. Lundhild, S. Lynn, R. Mani, V. Marwah, C. McGregor, J. McDonnell, J. McHugh, B. McGuirk, J. Meeks, K. Mensah, M. Minhas, K. Mohan, H. Mohankumar, A. Munnolimath, G. Mulagund, P. Murguia, P. Murthy, A. Mylavaram, V. Moore, N. Muthukrishnan, S. Muthulingam, L. Nim, S. Panchumathy, R. Pang, V. Panteleenko, R. Pingte, K. Rajamani, A. Raghavan, M. Ramacher, R. Ramkissoon, S. Ravindhran, G. Ravipati, A. Ray, W. Ren, K. Rich, J. Rivera, C. A. L. Rueda, R. Rungta, S. Sahu, P. Shanthaveerappa, Y. Sarig, M. Savanur, S. Shankar, D. Sharma, A. Shen, B. Sinha, S. Sonawane, J. Spiller, J. Stamos, D. Steiner, J. Stern, M. Stewart, S. Stoian, R. Swonger, M. Subramaniam, N. Sundarappa, M. Susairaj, A. Tran, A. Tsukerman, C. Tuzla, T. Ueda, K. Umamageswaran, D. Utzig, E. Voss, N. Wagner, X. Wang, M. Wei, S. Wertheimer, P. Wheeler, D. Williams, A. Witkowski, S. Wolicki, D. M. Wong, Z. Yang, T. F. Yu, W. Zhang

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

## Part I Basic Database Administration

---

### 1 Getting Started with Database Administration

---

1.1	Changes on Oracle Database Release 23ai for Oracle Database Administrator's Guide	1-1
1.1.1	New Features in 23ai	1-2
1.1.2	Deprecated Features	1-2
1.1.3	Desupported Features	1-2
1.2	Types of Oracle Database Users	1-3
1.2.1	Database Administrators	1-3
1.2.2	Security Officers	1-4
1.2.3	Network Administrators	1-4
1.2.4	Application Developers	1-4
1.2.5	Application Administrators	1-5
1.2.6	Database Users	1-5
1.3	Tasks of a Database Administrator	1-5
1.3.1	Task 1: Evaluate the Database Server Hardware	1-6
1.3.2	Task 2: Install the Oracle Database Software	1-6
1.3.3	Task 3: Plan the Database	1-7
1.3.4	Task 4: Create and Open the Database	1-7
1.3.5	Task 5: Back Up the Database	1-8
1.3.6	Task 6: Enroll System Users	1-8
1.3.7	Task 7: Implement the Database Design	1-8
1.3.8	Task 8: Back Up the Fully Functional Database	1-8
1.3.9	Task 9: Tune Database Performance	1-8
1.3.10	Task 10: Download and Install Release Updates and Release Update Revisions	1-9

1.3.11	Task 11: Roll Out to Additional Hosts	1-9
1.4	SQL Statements	1-10
1.4.1	Submitting Commands and SQL to the Database	1-10
1.4.2	About SQL*Plus	1-11
1.4.3	Connecting to the Database with SQL*Plus	1-11
1.4.3.1	About Connecting to the Database with SQL*Plus	1-12
1.4.3.2	Step 1: Open a Command Window	1-12
1.4.3.3	Step 2: Set Operating System Environment Variables	1-12
1.4.3.4	Step 3: Start SQL*Plus	1-13
1.4.3.5	Step 4: Submit the SQL*Plus CONNECT Command	1-13
1.5	Identifying Your Oracle Database Software Release	1-18
1.5.1	About Oracle Database Release Numbers	1-18
1.5.2	Checking Your Current Release Number	1-20
1.6	About Database Administrator Security and Privileges	1-21
1.6.1	The Database Administrator's Operating System Account	1-21
1.6.2	Administrative User Accounts	1-21
1.6.2.1	About Administrative User Accounts	1-22
1.6.2.2	SYS	1-23
1.6.2.3	SYSTEM	1-23
1.6.2.4	SYSBACKUP, SYSDG, SYSKM, and SYSRAC	1-23
1.6.2.5	The DBA Role	1-24
1.7	Database Administrator Authentication	1-25
1.7.1	Administrative Privileges	1-25
1.7.2	Operations Authorized by Administrative Privileges	1-26
1.7.3	Authentication Methods for Database Administrators	1-29
1.7.3.1	About Authentication Methods for Database Administrators	1-29
1.7.3.2	Nonsecure Remote Connections	1-30
1.7.3.3	Local Connections and Secure Remote Connections	1-31
1.7.4	Using Operating System Authentication	1-31
1.7.4.1	Operating System Groups	1-31
1.7.4.2	Preparing to Use Operating System Authentication	1-33
1.7.4.3	Connecting Using Operating System Authentication	1-33
1.7.5	Using Password File Authentication	1-34
1.7.5.1	Preparing to Use Password File Authentication	1-34
1.7.5.2	Connecting Using Password File Authentication	1-36
1.8	Creating and Maintaining a Database Password File	1-36
1.8.1	ORAPWD Syntax and Command Line Argument Descriptions	1-37
1.8.2	Creating a Database Password File with ORAPWD	1-43
1.8.3	Sharing and Disabling the Database Password File	1-45
1.8.4	Keeping Administrator Passwords Synchronized with the Data Dictionary	1-45
1.8.5	Adding Users to a Database Password File	1-47
1.8.6	Granting and Revoking Administrative Privileges	1-47

1.8.7	Viewing Database Password File Members	1-48
1.8.8	Removing a Database Password File	1-49
1.9	Data Utilities	1-49

## 2 Configuring Automatic Restart of an Oracle Database

---

2.1	About Oracle Restart	2-1
2.1.1	Oracle Restart Overview	2-2
2.1.2	About Startup Dependencies	2-3
2.1.3	About Starting and Stopping Components with Oracle Restart	2-3
2.1.4	About Starting and Stopping Oracle Restart	2-4
2.1.5	Oracle Restart Configuration	2-4
2.1.6	Oracle Restart Integration with Oracle Data Guard	2-6
2.1.7	Fast Application Notification with Oracle Restart	2-7
2.1.7.1	Overview of Fast Application Notification	2-7
2.1.7.2	Application High Availability with Services and FAN	2-8
2.2	Configuring Oracle Restart	2-11
2.2.1	About Configuring Oracle Restart	2-13
2.2.2	Preparing to Run SRVCTL	2-13
2.2.3	Obtaining Help for SRVCTL	2-14
2.2.4	Adding Components to the Oracle Restart Configuration	2-15
2.2.5	Removing Components from the Oracle Restart Configuration	2-16
2.2.6	Disabling and Enabling Oracle Restart Management for a Component	2-17
2.2.7	Viewing Component Status	2-18
2.2.8	Viewing the Oracle Restart Configuration for a Component	2-18
2.2.9	Modifying the Oracle Restart Configuration for a Component	2-19
2.2.10	Managing Environment Variables in the Oracle Restart Configuration	2-20
2.2.10.1	About Environment Variables in the Oracle Restart Configuration	2-20
2.2.10.2	Setting and Unsetting Environment Variables	2-21
2.2.10.3	Viewing Environment Variables	2-21
2.2.11	Creating and Deleting Database Services with SRVCTL	2-22
2.2.12	Enabling FAN Events in an Oracle Restart Environment	2-23
2.2.13	Automating the Failover of Connections Between Primary and Standby Databases	2-24
2.2.14	Enabling Clients for Fast Connection Failover	2-25
2.2.14.1	About Enabling Clients for Fast Connection Failover	2-25
2.2.14.2	Enabling Fast Connection Failover for JDBC Clients	2-26
2.2.14.3	Enabling Fast Connection Failover for Oracle Call Interface Clients	2-27
2.2.14.4	Enabling Fast Connection Failover for ODP.NET Clients	2-28
2.3	Starting and Stopping Components Managed by Oracle Restart	2-29
2.4	Stopping and Restarting Oracle Restart for Maintenance Operations	2-31
2.5	SRVCTL Command Reference for Oracle Restart	2-33

2.5.1	add	2-35
2.5.1.1	srvctl add asm	2-36
2.5.1.2	srvctl add database	2-37
2.5.1.3	srvctl add listener	2-39
2.5.1.4	srvctl add ons	2-40
2.5.1.5	srvctl add service	2-41
2.5.2	config	2-45
2.5.2.1	srvctl config asm	2-45
2.5.2.2	srvctl config database	2-46
2.5.2.3	srvctl config listener	2-47
2.5.2.4	srvctl config ons	2-47
2.5.2.5	srvctl config service	2-47
2.5.3	disable	2-48
2.5.3.1	srvctl disable asm	2-49
2.5.3.2	srvctl disable database	2-49
2.5.3.3	srvctl disable diskgroup	2-50
2.5.3.4	srvctl disable listener	2-50
2.5.3.5	srvctl disable ons	2-51
2.5.3.6	srvctl disable service	2-51
2.5.4	downgrade	2-52
2.5.4.1	srvctl downgrade database	2-52
2.5.5	enable	2-53
2.5.5.1	srvctl enable asm	2-53
2.5.5.2	srvctl enable database	2-54
2.5.5.3	srvctl enable diskgroup	2-54
2.5.5.4	srvctl enable listener	2-55
2.5.5.5	srvctl enable ons	2-55
2.5.5.6	srvctl enable service	2-55
2.5.6	getenv	2-56
2.5.6.1	srvctl getenv asm	2-57
2.5.6.2	srvctl getenv database	2-57
2.5.6.3	srvctl getenv listener	2-58
2.5.7	modify	2-58
2.5.7.1	srvctl modify asm	2-59
2.5.7.2	srvctl modify database	2-59
2.5.7.3	srvctl modify listener	2-60
2.5.7.4	srvctl modify ons	2-61
2.5.7.5	srvctl modify service	2-62
2.5.8	remove	2-66
2.5.8.1	srvctl remove asm	2-66
2.5.8.2	srvctl remove database	2-67
2.5.8.3	srvctl remove diskgroup	2-68

2.5.8.4	srvctl remove listener	2-68
2.5.8.5	srvctl remove ons	2-69
2.5.8.6	srvctl remove service	2-69
2.5.9	setenv	2-70
2.5.9.1	srvctl setenv asm	2-71
2.5.9.2	srvctl setenv database	2-71
2.5.9.3	srvctl setenv listener	2-72
2.5.10	start	2-73
2.5.10.1	srvctl start asm	2-73
2.5.10.2	srvctl start database	2-74
2.5.10.3	srvctl start diskgroup	2-75
2.5.10.4	srvctl start home	2-75
2.5.10.5	srvctl start listener	2-76
2.5.10.6	srvctl start ons	2-76
2.5.10.7	srvctl start service	2-77
2.5.11	status	2-78
2.5.11.1	srvctl status asm	2-78
2.5.11.2	srvctl status database	2-79
2.5.11.3	srvctl status diskgroup	2-79
2.5.11.4	srvctl status home	2-80
2.5.11.5	srvctl status listener	2-80
2.5.11.6	srvctl status ons	2-81
2.5.11.7	srvctl status service	2-81
2.5.12	stop	2-82
2.5.12.1	srvctl stop asm	2-83
2.5.12.2	srvctl stop database	2-83
2.5.12.3	srvctl stop diskgroup	2-84
2.5.12.4	srvctl stop home	2-85
2.5.12.5	srvctl stop listener	2-86
2.5.12.6	srvctl stop ons	2-86
2.5.12.7	srvctl stop service	2-87
2.5.13	unsetenv	2-88
2.5.13.1	srvctl unsetenv asm	2-89
2.5.13.2	srvctl unsetenv database	2-89
2.5.13.3	srvctl unsetenv listener	2-90
2.5.14	update	2-90
2.5.14.1	srvctl update database	2-91
2.5.15	upgrade	2-91
2.5.15.1	srvctl upgrade database	2-91
2.6	CRSCTL Command Reference	2-92
2.6.1	check	2-92
2.6.2	config	2-93

2.6.3	disable	2-93
2.6.4	enable	2-93
2.6.5	start	2-93
2.6.6	stop	2-93

## 3 Managing Processes

---

3.1	About Dedicated and Shared Server Processes	3-2
3.1.1	Dedicated Server Processes	3-2
3.1.2	Shared Server Processes	3-3
3.2	About Database Resident Connection Pooling	3-5
3.2.1	Comparing DRCP to Dedicated Server and Shared Server	3-7
3.3	About Proxy Resident Connection Pooling	3-8
3.4	Configuring Oracle Database for Shared Server	3-9
3.4.1	Initialization Parameters for Shared Server	3-10
3.4.2	Memory Management for Shared Server	3-10
3.4.3	Enabling Shared Server	3-10
3.4.3.1	About Determining a Value for SHARED_SERVERS	3-12
3.4.3.2	Decreasing the Number of Shared Server Processes	3-12
3.4.3.3	Limiting the Number of Shared Server Processes	3-12
3.4.3.4	Limiting the Number of Shared Server Sessions	3-13
3.4.3.5	Protecting Shared Memory	3-13
3.4.4	Configuring Dispatchers	3-14
3.4.4.1	DISPATCHERS Initialization Parameter Attributes	3-15
3.4.4.2	Determining the Number of Dispatchers	3-16
3.4.4.3	Setting the Initial Number of Dispatchers	3-16
3.4.4.4	Altering the Number of Dispatchers	3-17
3.4.4.5	Shutting Down Specific Dispatcher Processes	3-19
3.4.5	Disabling Shared Server	3-19
3.4.6	Shared Server Data Dictionary Views	3-19
3.5	Configuring Database Resident Connection Pooling	3-20
3.5.1	Database Resident Connection Pooling Initialization Parameters	3-21
3.5.2	Enabling Database Resident Connection Pooling	3-22
3.5.3	Configuring the Connection Pool for Database Resident Connection Pooling	3-23
3.5.3.1	Configuration Parameters for Database Resident Connection Pooling	3-24
3.5.4	Using Multi-Pool Database Resident Connection Pooling	3-26
3.5.5	Data Dictionary Views for Database Resident Connection Pooling	3-27
3.5.6	Determining the States of Connections in the Connection Pool	3-28
3.6	About Oracle Database Background Processes	3-29
3.7	Managing Prespawnd Processes	3-30
3.7.1	About Managing Prespawnd Processes	3-30
3.7.2	Managing Pools for Prespawnd Processes	3-31

3.8	Managing Processes for Parallel SQL Execution	3-32
3.8.1	About Parallel Execution Servers	3-33
3.8.2	Altering Parallel Execution for a Session	3-33
3.8.2.1	Disabling Parallel SQL Execution	3-34
3.8.2.2	Enabling Parallel SQL Execution	3-34
3.8.2.3	Forcing Parallel SQL Execution	3-34
3.9	Managing Processes for External Procedures	3-35
3.9.1	About External Procedures	3-35
3.9.2	DBA Tasks to Enable External Procedure Calls	3-36
3.10	Terminating Sessions	3-37
3.10.1	About Terminating Sessions	3-37
3.10.2	Identifying Which Session to Terminate	3-38
3.10.3	Terminating an Active Session	3-38
3.10.4	Terminating an Inactive Session	3-39
3.10.5	Cancelling a SQL Statement in a Session	3-40
3.11	Process and Session Data Dictionary Views	3-41

## 4 Managing Memory

---

4.1	About Memory Management	4-2
4.2	Memory Architecture Overview	4-3
4.3	Using Unified Memory Management	4-5
4.4	Using Automatic Memory Management	4-5
4.4.1	About Automatic Memory Management	4-6
4.4.2	Enabling Automatic Memory Management	4-6
4.4.3	Monitoring and Tuning Automatic Memory Management	4-9
4.5	Configuring Memory Manually	4-10
4.5.1	About Manual Memory Management	4-10
4.5.2	Using Automatic Shared Memory Management	4-11
4.5.2.1	About Automatic Shared Memory Management	4-12
4.5.2.2	Components and Granules in the SGA	4-12
4.5.2.3	Setting Maximum SGA Size	4-13
4.5.2.4	Setting SGA Target Size	4-13
4.5.2.5	Enabling Automatic Shared Memory Management	4-15
4.5.2.6	Setting Minimums for Automatically Sized SGA Components	4-17
4.5.2.7	Dynamic Modification of SGA_TARGET	4-17
4.5.2.8	Modifying Parameters for Automatically Sized Components	4-18
4.5.2.9	Modifying Parameters for Manually Sized Components	4-19
4.5.3	Using Manual Shared Memory Management	4-19
4.5.3.1	About Manual Shared Memory Management	4-20
4.5.3.2	Enabling Manual Shared Memory Management	4-20
4.5.3.3	Setting the Buffer Cache Initialization Parameters	4-20

4.5.3.4	Specifying the Shared Pool Size	4-23
4.5.3.5	Specifying the Large Pool Size	4-24
4.5.3.6	Specifying the Java Pool Size	4-24
4.5.3.7	Specifying the Streams Pool Size	4-24
4.5.3.8	Specifying the Vector Pool Size	4-24
4.5.3.9	Specifying Miscellaneous SGA Initialization Parameters	4-24
4.5.4	Using Automatic PGA Memory Management	4-25
4.5.5	Using Manual PGA Memory Management	4-27
4.6	Using Force Full Database Caching Mode	4-27
4.6.1	About Force Full Database Caching Mode	4-28
4.6.2	Before Enabling Force Full Database Caching Mode	4-29
4.6.3	Enabling Force Full Database Caching Mode	4-29
4.6.4	Disabling Force Full Database Caching Mode	4-30
4.7	Configuring Database Smart Flash Cache	4-30
4.7.1	When to Configure Database Smart Flash Cache	4-31
4.7.2	Sizing Database Smart Flash Cache	4-31
4.7.3	Tuning Memory for Database Smart Flash Cache	4-31
4.7.4	Database Smart Flash Cache Initialization Parameters	4-32
4.7.5	Database Smart Flash Cache in an Oracle Real Applications Clusters Environment	4-33
4.8	Improving Query Response Time with the Server Result Cache	4-34
4.8.1	About the Server Result Cache	4-34
4.8.2	Using the Server Result Cache	4-34
4.8.3	Specifying the Result Cache Maximum Size	4-35
4.8.4	Specifying the Use of Temporary Segments for Query Results	4-36
4.9	Improving Query Performance with Oracle Database In-Memory	4-37
4.10	Enabling High Performance Data Streaming with the Memoptimized Rowstore	4-38
4.11	Memory Management Reference	4-39
4.11.1	Platforms That Support Automatic Memory Management	4-39
4.11.2	Memory Management Data Dictionary Views	4-39
4.12	Configuring and Using True Cache	4-40

## 5 Managing Users and Securing the Database

---

5.1	The Importance of Establishing a Security Policy for Your Database	5-1
5.2	Managing Users and Resources	5-1
5.3	User Privileges and Roles	5-2
5.4	Auditing Database Activity	5-2
5.5	Predefined User Accounts	5-3

## 6 Monitoring the Database

---

6.1	Monitoring Errors and Alerts	6-1
6.1.1	Monitoring Errors with Trace Files and the Alert Log	6-2
6.1.1.1	About Monitoring Errors with Trace Files and the Alert Log	6-2
6.1.1.2	Controlling the Size of an Alert Log	6-3
6.1.1.3	Controlling the Size of Trace Files	6-4
6.1.1.4	Controlling When Oracle Database Writes to Trace Files	6-5
6.1.1.5	Reading the Trace File for Shared Server Sessions	6-6
6.1.2	Monitoring a Database with Server-Generated Alerts	6-6
6.1.2.1	About Monitoring a Database with Server-Generated Alerts	6-6
6.1.2.2	Setting and Retrieving Thresholds for Server-Generated Alerts	6-7
6.1.2.3	Viewing Server-Generated Alerts	6-9
6.1.2.4	Server-Generated Alerts Data Dictionary Views	6-10
6.2	Monitoring Performance	6-10
6.2.1	Monitoring Locks	6-10
6.2.2	About Monitoring Wait Events	6-11
6.2.3	Performance Monitoring Data Dictionary Views	6-11
6.3	Monitoring Quarantined Objects	6-12
6.3.1	About Object Quarantine	6-12
6.3.2	Viewing Quarantined Objects	6-13
6.4	Automatically Monitoring Schema Objects	6-13

## 7 Diagnosing and Resolving Problems

---

7.1	About the Oracle Database Fault Diagnosability Infrastructure	7-1
7.1.1	Fault Diagnosability Infrastructure Overview	7-2
7.1.2	Incidents and Problems	7-3
7.1.2.1	About Incidents and Problems	7-3
7.1.2.2	Incident Flood Control	7-4
7.1.2.3	Related Problems Across the Topology	7-5
7.1.3	Fault Diagnosability Infrastructure Components	7-5

## Part II Oracle Database Structure and Storage

---

### 8 Managing Control Files

---

8.1	What Is a Control File?	8-1
8.2	Guidelines for Control Files	8-2
8.2.1	Provide File Names for the Control Files	8-2
8.2.2	Multiplex Control Files on Different Disks	8-3

8.2.3	Back Up Control Files	8-3
8.2.4	Manage the Size of Control Files	8-3
8.3	Creating Control Files	8-4
8.3.1	Creating Initial Control Files	8-4
8.3.2	Creating Additional Copies, Renaming, and Relocating Control Files	8-5
8.3.3	Creating New Control Files	8-5
8.3.3.1	When to Create New Control Files	8-5
8.3.3.2	The CREATE CONTROLFILE Statement	8-6
8.3.3.3	Creating New Control Files	8-7
8.4	Troubleshooting After Creating Control Files	8-8
8.4.1	Checking for Missing or Extra Files	8-8
8.4.2	Handling Errors During CREATE CONTROLFILE	8-9
8.5	Backing Up Control Files	8-9
8.6	Recovering a Control File Using a Current Copy	8-9
8.6.1	Recovering from Control File Corruption Using a Control File Copy	8-9
8.6.2	Recovering from Permanent Media Failure Using a Control File Copy	8-10
8.7	Dropping Control Files	8-10
8.8	Control Files Data Dictionary Views	8-11

## 9 Managing the Redo Log

---

9.1	What Is the Redo Log?	9-2
9.1.1	Redo Threads	9-2
9.1.2	Redo Log Contents	9-2
9.1.3	How Oracle Database Writes to the Redo Log	9-3
9.1.3.1	Active (Current) and Inactive Redo Log Files	9-4
9.1.3.2	Log Switches and Log Sequence Numbers	9-4
9.2	Planning the Redo Log	9-5
9.2.1	Multiplexing Redo Log Files	9-6
9.2.1.1	Responding to Redo Log Failure	9-7
9.2.1.2	Valid and Invalid Configurations	9-8
9.2.2	Placing Redo Log Members on Different Disks	9-8
9.2.3	Planning the Size of Redo Log Files	9-9
9.2.4	Planning the Block Size of Redo Log Files	9-9
9.2.5	Choosing the Number of Redo Log Files	9-10
9.2.6	Controlling Archive Lag	9-11
9.2.6.1	Setting the ARCHIVE_LAG_TARGET Initialization Parameter	9-11
9.2.6.2	Factors Affecting the Setting of ARCHIVE_LAG_TARGET	9-12
9.3	Creating Redo Log Groups and Members	9-12
9.3.1	Creating Redo Log Groups	9-13
9.3.2	Creating Redo Log Members	9-13
9.4	Relocating and Renaming Redo Log Members	9-14

9.5	Dropping Redo Log Groups and Members	9-15
9.5.1	Dropping Log Groups	9-16
9.5.2	Dropping Redo Log Members	9-16
9.6	Forcing Log Switches	9-17
9.7	Verifying Blocks in Redo Log Files	9-17
9.8	Clearing a Redo Log File	9-18
9.9	Reduction of Redo Generation for Direct Path Operations	9-19
9.10	Redo Log Data Dictionary Views	9-20

## 10 Managing Archived Redo Log Files

---

10.1	What Is the Archived Redo Log?	10-2
10.2	Choosing Between NOARCHIVELOG and ARCHIVELOG Mode	10-2
10.2.1	Running a Database in NOARCHIVELOG Mode	10-3
10.2.2	Running a Database in ARCHIVELOG Mode	10-3
10.3	Controlling Archiving	10-4
10.3.1	Setting the Initial Database Archiving Mode	10-5
10.3.2	Changing the Database Archiving Mode	10-5
10.3.3	Performing Manual Archiving	10-6
10.3.4	Adjusting the Number of Archiver Processes	10-7
10.4	Specifying Archive Destinations	10-7
10.4.1	Setting Initialization Parameters for Archive Destinations	10-7
10.4.1.1	Method 1: Using the LOG_ARCHIVE_DEST_n Parameter	10-8
10.4.1.2	Method 2: Using LOG_ARCHIVE_DEST and LOG_ARCHIVE_DUPLEX_DEST	10-10
10.4.2	Expanding Alternate Destinations with Log Archive Destination Groups	10-11
10.4.2.1	About Log Archive Destination Groups	10-11
10.4.2.2	Specifying Log Archive Destination Groups	10-12
10.4.3	Understanding Archive Destination Status	10-13
10.4.4	Specifying Alternate Destinations	10-14
10.5	About Log Transmission Modes	10-14
10.5.1	Normal Transmission Mode	10-15
10.5.2	Standby Transmission Mode	10-15
10.6	Managing Archive Destination Failure	10-15
10.6.1	Specifying the Minimum Number of Successful Destinations	10-16
10.6.1.1	Specifying Mandatory and Optional Destinations	10-16
10.6.1.2	Specifying the Number of Successful Destinations: Scenarios	10-17
10.6.2	Rearchiving to a Failed Destination	10-18
10.7	Controlling Trace Output Generated by the Archivelog Process	10-19
10.8	Viewing Information About the Archived Redo Log	10-19
10.8.1	Archived Redo Log Files Views	10-20

## 11 Managing Tablespaces

---

11.1	Guidelines for Managing Tablespaces	11-2
11.1.1	Use Multiple Tablespaces	11-2
11.1.2	Assign Tablespace Quotas to Users	11-3
11.2	Creating Tablespaces	11-3
11.2.1	About Creating Tablespaces	11-4
11.2.2	Locally Managed Tablespaces	11-5
11.2.2.1	About Locally Managed Tablespaces	11-5
11.2.2.2	Creating a Locally Managed Tablespace	11-6
11.2.2.3	Specifying Segment Space Management in Locally Managed Tablespaces	11-7
11.2.3	Bigfile Tablespaces	11-8
11.2.3.1	About Bigfile Tablespaces	11-8
11.2.3.2	Creating a Bigfile Tablespace	11-9
11.2.3.3	Identifying a Bigfile Tablespace	11-10
11.2.4	Tablespaces with Default Compression Attributes	11-10
11.2.4.1	About Tablespaces with Default Compression Attributes	11-10
11.2.4.2	Creating Tablespaces with Default Compression Attributes	11-10
11.2.5	Encrypted Tablespaces	11-11
11.2.5.1	About Encrypted Tablespaces	11-11
11.2.5.2	Creating Encrypted Tablespaces	11-13
11.2.5.3	Viewing Information About Encrypted Tablespaces	11-14
11.2.6	Temporary Tablespaces	11-14
11.2.6.1	About Temporary Tablespaces	11-15
11.2.6.2	Creating a Locally Managed Temporary Tablespace	11-17
11.2.6.3	Creating a Bigfile Temporary Tablespace	11-18
11.2.6.4	Viewing Space Usage for Temporary Tablespaces	11-18
11.2.7	Temporary Tablespace Groups	11-18
11.2.7.1	Multiple Temporary Tablespaces: Using Tablespace Groups	11-18
11.2.7.2	Creating a Tablespace Group	11-19
11.2.7.3	Changing Members of a Tablespace Group	11-19
11.2.7.4	Assigning a Tablespace Group as the Default Temporary Tablespace	11-20
11.3	Consider Storing Tablespaces in the In-Memory Column Store	11-20
11.4	Specifying Nonstandard Block Sizes for Tablespaces	11-21
11.5	Controlling the Writing of Redo Records	11-21
11.6	Altering Tablespace Availability	11-22
11.6.1	Taking Tablespaces Offline	11-22
11.6.2	Bringing Tablespaces Online	11-24
11.7	Using Read-Only Tablespaces	11-24

11.7.1	About Read-Only Tablespaces	11-25
11.7.2	Making a Tablespace Read-Only	11-25
11.7.3	Making a Read-Only Tablespace Writable	11-27
11.7.4	Creating a Read-Only Tablespace on a WORM Device	11-28
11.7.5	Delaying the Opening of Data Files in Read-Only Tablespaces	11-28
11.7.6	Using Read-Only Tablespaces on Object Storage	11-29
11.7.6.1	Enabling a Database for Using Object Storage	11-29
11.7.6.2	Accessing Data in Object Storage	11-32
11.7.6.3	Dropping a Read-Only Tablespace and It's Data Files in Object Storage	11-35
11.8	Altering and Maintaining Tablespaces	11-35
11.8.1	Increasing the Size of a Tablespace	11-36
11.8.2	Altering a Locally Managed Tablespace	11-36
11.8.3	Altering a Bigfile Tablespace	11-37
11.8.4	Shrinking a Tablespace	11-37
11.8.5	Altering a Locally Managed Temporary Tablespace	11-41
11.8.6	Shrinking a Locally Managed Temporary Tablespace	11-42
11.9	Renaming Tablespaces	11-42
11.10	Dropping Tablespaces	11-43
11.11	Managing Lost Write Protection with Shadow Tablespaces	11-44
11.11.1	About Shadow Lost Write Protection	11-45
11.11.2	Creating Shadow Tablespaces for Shadow Lost Write Protection	11-47
11.11.3	Enabling Shadow Lost Write Protection for a Database	11-47
11.11.4	Enabling Shadow Lost Write Protection for Tablespaces and Data Files	11-49
11.11.5	Disabling Shadow Lost Write Protection for a Database	11-50
11.11.6	Removing or Suspending Shadow Lost Write Protection	11-51
11.11.7	Dropping a Shadow Tablespace	11-52
11.12	Managing the SYSAUX Tablespace	11-52
11.12.1	Monitoring Occupants of the SYSAUX Tablespace	11-53
11.12.2	Moving Occupants Out Of or Into the SYSAUX Tablespace	11-53
11.12.3	Controlling the Size of the SYSAUX Tablespace	11-54
11.13	Correcting Problems with Locally Managed Tablespaces	11-54
11.13.1	Diagnosing and Repairing Locally Managed Tablespace Problems	11-55
11.13.2	Scenario 1: Fixing Bitmap When Allocated Blocks are Marked Free (No Overlap)	11-56
11.13.3	Scenario 2: Dropping a Corrupted Segment	11-57
11.13.4	Scenario 3: Fixing Bitmap Where Overlap is Reported	11-57
11.13.5	Scenario 4: Correcting Media Corruption of Bitmap Blocks	11-57
11.13.6	Scenario 5: Migrating from a Dictionary-Managed to a Locally Managed Tablespace	11-57
11.14	Migrating the SYSTEM Tablespace to a Locally Managed Tablespace	11-58
11.15	Viewing Information About Tablespaces	11-59
11.15.1	Tablespace Data Dictionary Views	11-59

11.15.2	Example 1: Listing Tablespaces and Default Storage Parameters	11-60
11.15.3	Example 2: Listing the Data Files and Associated Tablespaces of a Database	11-60
11.15.4	Example 3: Displaying Statistics for Free Space (Extents) of Each Tablespace	11-61

## 12 Managing Data Files and Temp Files

---

12.1	Guidelines for Managing Data Files	12-2
12.1.1	About Data Files	12-2
12.1.2	Determine the Number of Data Files	12-3
12.1.2.1	About Determining the Number of Data Files	12-3
12.1.2.2	Determine a Value for the DB_FILES Initialization Parameter	12-4
12.1.2.3	Consider Possible Limitations When Adding Data Files to a Tablespace	12-4
12.1.2.4	Consider the Performance Impact of the Number of Data Files	12-4
12.1.3	Determine the Size of Data Files	12-5
12.1.4	Place Data Files Appropriately	12-5
12.1.5	Store Data Files Separate from Redo Log Files	12-5
12.2	Creating Data Files and Adding Data Files to a Tablespace	12-5
12.3	Changing Data File Size	12-6
12.3.1	Enabling and Disabling Automatic Extension for a Data File	12-6
12.3.2	Manually Resizing a Data File	12-7
12.4	Altering Data File Availability	12-8
12.4.1	About Altering Data File Availability	12-8
12.4.2	Bringing Data Files Online or Taking Offline in ARCHIVELOG Mode	12-9
12.4.3	Taking Data Files Offline in NOARCHIVELOG Mode	12-9
12.4.4	Altering the Availability of All Data Files or Temp Files in a Tablespace	12-10
12.5	Renaming and Relocating Data Files	12-10
12.5.1	Renaming and Relocating Online Data Files	12-11
12.5.2	Renaming and Relocating Offline Data Files	12-13
12.5.2.1	Procedures for Renaming and Relocating Offline Data Files in a Single Tablespace	12-14
12.5.2.2	Renaming and Relocating Offline Data Files in Multiple Tablespaces	12-16
12.6	Dropping Data Files	12-17
12.7	Verifying Data Blocks in Data Files	12-18
12.8	Copying Files Using the Database Server	12-18
12.8.1	About Copying Files Using the Database Server	12-19
12.8.2	Copying a File on a Local File System	12-19
12.8.3	Third-Party File Transfer	12-20
12.8.4	Advanced File Transfer Mechanisms	12-21
12.8.5	File Transfer and the DBMS_SCHEDULER Package	12-21
12.9	Mapping Files to Physical Devices	12-22
12.9.1	Overview of Oracle Database File Mapping Interface	12-23
12.9.2	How the Oracle Database File Mapping Interface Works	12-23

12.9.2.1	Components of File Mapping	12-23
12.9.2.2	Mapping Structures	12-25
12.9.2.3	Example of Mapping Structures	12-26
12.9.2.4	Configuration ID	12-27
12.9.3	Using the Oracle Database File Mapping Interface	12-27
12.9.3.1	Enabling File Mapping	12-28
12.9.3.2	Using the DBMS_STORAGE_MAP Package	12-29
12.9.3.3	Obtaining Information from the File Mapping Views	12-29
12.9.4	File Mapping Examples	12-31
12.9.4.1	Example 1: Map All Database Files that Span a Device	12-31
12.9.4.2	Example 2: Map a File Into Its Corresponding Devices	12-32
12.9.4.3	Example 3: Map a Database Object	12-32
12.10	Data Files Data Dictionary Views	12-33

## 13 Transporting Data

---

13.1	About Transporting Data	13-1
13.1.1	Purpose of Transporting Data	13-2
13.1.2	Transporting Data: Scenarios	13-2
13.1.2.1	Scenarios for Full Transportable Export/import	13-2
13.1.2.2	Scenarios for Transportable Tablespaces or Transportable Tables	13-4
13.1.3	Transporting Data Across Platforms	13-8
13.1.4	General Limitations on Transporting Data	13-10
13.1.5	Compatibility Considerations for Transporting Data	13-12
13.2	Transporting Databases	13-13
13.2.1	Introduction to Full Transportable Export/Import	13-13
13.2.2	Limitations on Full Transportable Export/import	13-14
13.2.3	Transporting a Database Using an Export Dump File	13-15
13.2.4	Transporting a Database Over the Network	13-21
13.3	Transporting Tablespaces Between Databases	13-26
13.3.1	Introduction to Transportable Tablespaces	13-27
13.3.2	Limitations on Transportable Tablespaces	13-27
13.3.3	Transporting Tablespaces Between Databases	13-28
13.3.3.1	Task 1: Pick a Self-Contained Set of Tablespaces	13-30
13.3.3.2	Task 2: Generate a Transportable Tablespace Set	13-31
13.3.3.3	Task 3: Transport the Export Dump File	13-33
13.3.3.4	Task 4: Transport the Tablespace Set	13-33
13.3.3.5	Task 5: (Optional) Restore Tablespaces to Read/Write Mode	13-34
13.3.3.6	Task 6: Import the Tablespace Set	13-34
13.4	Transporting Tables, Partitions, or Subpartitions Between Databases	13-36
13.4.1	Introduction to Transportable Tables	13-37
13.4.2	Limitations on Transportable Tables	13-37

13.4.3	Transporting Tables, Partitions, or Subpartitions Using an Export Dump File	13-38
13.4.4	Transporting Tables, Partitions, or Subpartitions Over the Network	13-43
13.5	Converting Data Between Platforms	13-48
13.5.1	Converting Data Between Platforms Using the DBMS_FILE_TRANSFER Package	13-48
13.5.2	Converting Data Between Platforms Using RMAN	13-50
13.5.2.1	Converting Tablespaces on the Source System After Export	13-51
13.5.2.2	Converting Data Files on the Target System Before Import	13-52
13.6	Guidelines for Transferring Data Files	13-53

## 14 Managing Undo

---

14.1	What Is Undo?	14-2
14.2	Introduction to Automatic Undo Management	14-2
14.2.1	Overview of Automatic Undo Management	14-2
14.2.2	The Undo Retention Period	14-4
14.2.2.1	About the Undo Retention Period	14-4
14.2.2.2	Automatic Tuning of Undo Retention	14-5
14.2.2.3	Retention Guarantee	14-6
14.2.2.4	Undo Retention Tuning and Alert Thresholds	14-7
14.2.2.5	Tracking the Tuned Undo Retention Period	14-7
14.3	Setting the Minimum Undo Retention Period	14-8
14.4	Sizing a Fixed-Size Undo Tablespace	14-8
14.4.1	Activating the Undo Advisor PL/SQL Interface	14-9
14.5	Managing Undo Tablespaces	14-10
14.5.1	Creating an Undo Tablespace	14-10
14.5.1.1	About Creating an Undo Tablespace	14-11
14.5.1.2	Using CREATE DATABASE to Create an Undo Tablespace	14-11
14.5.1.3	Using the CREATE UNDO TABLESPACE Statement	14-12
14.5.2	Altering an Undo Tablespace	14-12
14.5.3	Dropping an Undo Tablespace	14-13
14.5.4	Switching Undo Tablespaces	14-13
14.5.5	Establishing User Quotas for Undo Space	14-14
14.5.6	Managing Space Threshold Alerts for the Undo Tablespace	14-14
14.6	Migrating to Automatic Undo Management	14-15
14.7	Managing Temporary Undo	14-15
14.7.1	About Managing Temporary Undo	14-15
14.7.2	Enabling and Disabling Temporary Undo	14-16
14.8	Undo Space Data Dictionary Views	14-17

## 15 Using Oracle Managed Files

---

15.1	About Oracle Managed Files	15-1
15.1.1	What Is Oracle Managed Files?	15-2
15.1.2	Who Can Use Oracle Managed Files?	15-2
15.1.3	What Is a Logical Volume Manager?	15-3
15.1.4	What Is a File System?	15-3
15.1.5	Benefits of Using Oracle Managed Files	15-3
15.1.6	Oracle Managed Files and Existing Functionality	15-4
15.2	Enabling the Creation and Use of Oracle Managed Files	15-4
15.2.1	Initialization Parameters That Enable Oracle Managed Files	15-5
15.2.2	Setting the DB_CREATE_FILE_DEST Initialization Parameter	15-6
15.2.3	Setting the DB_RECOVERY_FILE_DEST Parameter	15-6
15.2.4	Setting the DB_CREATE_ONLINE_LOG_DEST_n Initialization Parameters	15-6
15.3	Creating Oracle Managed Files	15-7
15.3.1	When Oracle Database Creates Oracle Managed Files	15-7
15.3.2	How Oracle Managed Files Are Named	15-8
15.3.3	Creating Oracle Managed Files at Database Creation	15-9
15.3.3.1	Specifying Control Files at Database Creation	15-10
15.3.3.2	Specifying Redo Log Files at Database Creation	15-11
15.3.3.3	Specifying the SYSTEM and SYSAUX Tablespace Data Files at Database Creation	15-12
15.3.3.4	Specifying the Undo Tablespace Data File at Database Creation	15-12
15.3.3.5	Specifying the Default Temporary Tablespace Temp File at Database Creation	15-13
15.3.3.6	CREATE DATABASE Statement Using Oracle Managed Files: Examples	15-13
15.3.4	Creating Data Files for Tablespaces Using Oracle Managed Files	15-15
15.3.4.1	About Creating Data Files for Tablespaces Using Oracle Managed Files	15-15
15.3.4.2	CREATE TABLESPACE: Examples	15-16
15.3.4.3	CREATE UNDO TABLESPACE: Example	15-17
15.3.4.4	ALTER TABLESPACE: Example	15-18
15.3.5	Creating Temp Files for Temporary Tablespaces Using Oracle Managed Files	15-18
15.3.5.1	About Creating Temp Files for Temporary Tablespaces Using Oracle Managed Files	15-18
15.3.5.2	CREATE TEMPORARY TABLESPACE: Example	15-19
15.3.5.3	ALTER TABLESPACE... ADD TEMPFILE: Example	15-19
15.3.6	Creating Control Files Using Oracle Managed Files	15-20
15.3.6.1	About Creating Control Files Using Oracle Managed Files	15-20
15.3.6.2	CREATE CONTROLFILE Using NORESETLOGS Keyword: Example	15-21
15.3.6.3	CREATE CONTROLFILE Using RESETLOGS Keyword: Example	15-21
15.3.7	Creating Redo Log Files Using Oracle Managed Files	15-22
15.3.7.1	Using the ALTER DATABASE ADD LOGFILE Statement	15-22
15.3.7.2	Using the ALTER DATABASE OPEN RESETLOGS Statement	15-23

15.3.8	Creating Archived Logs Using Oracle Managed Files	15-23
15.4	Operation of Oracle Managed Files	15-23
15.4.1	Dropping Data Files and Temp Files	15-24
15.4.2	Dropping Redo Log Files	15-24
15.4.3	Renaming Files	15-24
15.4.4	Managing Standby Databases	15-25
15.5	Scenarios for Using Oracle Managed Files	15-25
15.5.1	Scenario 1: Create and Manage a Database with Multiplexed Redo Logs	15-25
15.5.2	Scenario 2: Create and Manage a Database with Database and Fast Recovery Areas	15-29
15.5.3	Scenario 3: Adding Oracle Managed Files to an Existing Database	15-30

## 16 Using Persistent Memory Database

---

16.1	About Persistent Memory Database	16-1
16.1.1	What Is Persistent Memory Database?	16-1
16.1.2	What Is Oracle Persistent Memory Filestore?	16-1
16.1.3	What Is Directly Mapped Buffer Cache?	16-2
16.1.4	Benefits of Using Persistent Memory Database	16-2
16.2	Setting Initialization Parameters for Persistent Memory Database	16-2
16.2.1	Persistent Memory Database Initialization Parameters	16-2
16.3	Creating a PMEM Filestore for an Oracle Database	16-3
16.3.1	Creating a PMEM Filestore Before Creating the Database	16-3
16.3.2	Creating a Database on PMEM Storage Using Oracle DBCA	16-4
16.3.3	Creating an Oracle Database in the PMEM Filestore	16-5
16.3.4	Migrating an Oracle Database to a PMEM Filestore	16-5
16.4	Managing a PMEM Filestore	16-5
16.4.1	Viewing Information About a PMEM Filestore	16-5
16.4.2	Mounting a PMEM Filestore	16-6
16.4.3	Dismounting a PMEM Filestore	16-6
16.4.4	Changing the Attributes of a PMEM Filestore	16-6
16.4.5	Dropping a PMEM Filestore	16-6

## Part III Schema Objects

---

### 17 Managing Schema Objects

---

17.1	About Common and Local Objects	17-2
17.2	About the Container for Schema Objects	17-2
17.3	Creating Multiple Tables and Views in a Single Operation	17-2
17.4	Analyzing Tables, Indexes, and Clusters	17-3
17.4.1	About Analyzing Tables, Indexes, and Clusters	17-4

17.4.2	Using DBMS_STATS to Collect Table and Index Statistics	17-4
17.4.3	Validating Tables, Indexes, Clusters, and Materialized Views	17-5
17.4.4	Cross Validation of a Table and an Index with a Query	17-6
17.4.5	Listing Chained Rows of Tables and Clusters	17-6
17.4.5.1	Creating a CHAINED_ROWS Table	17-7
17.4.5.2	Eliminating Migrated or Chained Rows in a Table	17-7
17.5	Truncating Tables and Clusters	17-8
17.5.1	Using DELETE to Truncate a Table	17-9
17.5.2	Using DROP and CREATE to Truncate a Table	17-9
17.5.3	Using TRUNCATE	17-9
17.6	Enabling and Disabling Triggers	17-10
17.6.1	About Enabling and Disabling Triggers	17-11
17.6.2	Enabling Triggers	17-12
17.6.3	Disabling Triggers	17-12
17.7	Managing Integrity Constraints	17-13
17.7.1	Integrity Constraint States	17-13
17.7.1.1	About Integrity Constraint States	17-14
17.7.1.2	About Disabling Constraints	17-14
17.7.1.3	About Enabling Constraints	17-15
17.7.1.4	About the Enable Novalidate Constraint State	17-15
17.7.1.5	Efficient Use of Integrity Constraints: A Procedure	17-15
17.7.2	Setting Integrity Constraints Upon Definition	17-16
17.7.2.1	Disabling Constraints Upon Definition	17-17
17.7.2.2	Enabling Constraints Upon Definition	17-17
17.7.3	Modifying, Renaming, or Dropping Existing Integrity Constraints	17-18
17.7.3.1	Disabling and Enabling Constraints	17-18
17.7.3.2	Renaming Constraints	17-19
17.7.3.3	Dropping Constraints	17-19
17.7.4	Deferring Constraint Checks	17-19
17.7.4.1	Set All Constraints Deferred	17-20
17.7.4.2	Check the Commit (Optional)	17-20
17.7.5	Reporting Constraint Exceptions	17-20
17.7.6	Viewing Constraint Information	17-22
17.8	Renaming Schema Objects	17-22
17.9	Managing Object Dependencies	17-23
17.9.1	About Object Dependencies and Object Invalidation	17-24
17.9.2	Manually Recompiling Invalid Objects with DDL	17-25
17.9.3	Manually Recompiling Invalid Objects with PL/SQL Package Procedures	17-25
17.10	Managing Object Name Resolution	17-26
17.11	Switching to a Different Schema	17-28
17.12	Managing Editions	17-28
17.12.1	About Editions and Edition-Based Redefinition	17-29

17.12.2	DBA Tasks for Edition-Based Redefinition	17-29
17.12.3	Setting the Database Default Edition	17-30
17.12.4	Querying the Database Default Edition	17-30
17.12.5	Setting the Edition Attribute of a Database Service	17-30
17.12.5.1	About Setting the Edition Attribute of a Database Service	17-31
17.12.5.2	Setting the Edition Attribute During Database Service Creation	17-31
17.12.5.3	Setting the Edition Attribute of an Existing Database Service	17-31
17.12.6	Using an Edition	17-32
17.12.7	Editions Data Dictionary Views	17-32
17.13	Displaying Information About Schema Objects	17-33
17.13.1	Using a PL/SQL Package to Display Information About Schema Objects	17-33
17.13.2	Schema Objects Data Dictionary Views	17-34
17.13.2.1	Example 1: Displaying Schema Objects By Type	17-34
17.13.2.2	Example 2: Displaying Dependencies of Views and Synonyms	17-35

## 18 Managing Space for Schema Objects

---

18.1	Managing Tablespace Alerts	18-1
18.1.1	About Managing Tablespace Alerts	18-2
18.1.2	Setting Alert Thresholds	18-3
18.1.3	Viewing Alerts	18-5
18.1.4	Limitations	18-5
18.2	Managing Resumable Space Allocation	18-6
18.2.1	Resumable Space Allocation Overview	18-6
18.2.1.1	How Resumable Space Allocation Works	18-7
18.2.1.2	What Operations are Resumable?	18-8
18.2.1.3	What Errors are Correctable?	18-8
18.2.1.4	Resumable Space Allocation and Distributed Operations	18-9
18.2.1.5	Parallel Execution and Resumable Space Allocation	18-9
18.2.2	Enabling and Disabling Resumable Space Allocation	18-9
18.2.2.1	About Enabling and Disabling Resumable Space Allocation	18-10
18.2.2.2	Setting the RESUMABLE_TIMEOUT Initialization Parameter	18-10
18.2.2.3	Using ALTER SESSION to Enable and Disable Resumable Space Allocation	18-11
18.2.3	Using a LOGON Trigger to Set Default Resumable Mode	18-12
18.2.4	Detecting Suspended Statements	18-12
18.2.4.1	Notifying Users: The AFTER SUSPEND System Event and Trigger	18-13
18.2.4.2	Using Views to Obtain Information About Suspended Statements	18-13
18.2.4.3	Using the DBMS_RESUMABLE Package	18-14
18.2.5	Operation-Suspended Alert	18-14
18.2.6	Resumable Space Allocation Example: Registering an AFTER SUSPEND Trigger	18-15
18.3	Reclaiming Unused Space	18-16

18.3.1	About Reclaimable Unused Space	18-17
18.3.2	The Segment Advisor	18-17
18.3.2.1	About the Segment Advisor	18-18
18.3.2.2	Using the Segment Advisor	18-18
18.3.2.3	Automatic Segment Advisor	18-18
18.3.2.4	Running the Segment Advisor Manually	18-19
18.3.2.5	Viewing Segment Advisor Results	18-24
18.3.2.6	Configuring the Automatic Segment Advisor	18-29
18.3.2.7	Viewing Automatic Segment Advisor Information	18-30
18.3.3	Shrinking Database Segments Online	18-31
18.3.4	Deallocating Unused Space	18-33
18.4	Dropping Unused Object Storage	18-34
18.5	Understanding Space Usage of Data Types	18-35
18.6	Displaying Information About Space Usage for Schema Objects	18-35
18.6.1	Using PL/SQL Packages to Display Information About Schema Object Space Usage	18-35
18.6.2	Schema Objects Space Usage Data Dictionary Views	18-36
18.6.2.1	Example 1: Displaying Segment Information	18-37
18.6.2.2	Example 2: Displaying Extent Information	18-37
18.6.2.3	Example 3: Displaying the Free Space (Extents) in a Tablespace	18-38
18.7	Capacity Planning for Database Objects	18-38
18.7.1	Estimating the Space Use of a Table	18-39
18.7.2	Estimating the Space Use of an Index	18-40
18.7.3	Obtaining Object Growth Trends	18-40

## 19 Managing Tables

---

19.1	About Tables	19-2
19.2	Guidelines for Managing Tables	19-3
19.2.1	Design Tables Before Creating Them	19-5
19.2.2	Specify the Type of Table to Create	19-5
19.2.3	Specify the Location of Each Table	19-6
19.2.4	Consider Parallelizing Table Creation	19-6
19.2.5	Consider Using NOLOGGING When Creating Tables	19-7
19.2.6	Consider Using Table Compression	19-7
19.2.6.1	About Table Compression	19-8
19.2.6.2	Examples Related to Table Compression	19-11
19.2.6.3	Compression and Partitioned Tables	19-13
19.2.6.4	Determining If a Table Is Compressed	19-13
19.2.6.5	Determining Which Rows Are Compressed	19-13
19.2.6.6	Changing the Compression Level	19-14
19.2.6.7	Adding and Dropping Columns in Compressed Tables	19-15

19.2.6.8	Exporting and Importing Hybrid Columnar Compression Tables	19-15
19.2.6.9	Restoring a Hybrid Columnar Compression Table	19-16
19.2.6.10	Notes and Restrictions for Compressed Tables	19-17
19.2.6.11	Packing Compressed Tables	19-17
19.2.7	Managing Table Compression Using Enterprise Manager Cloud Control	19-18
19.2.7.1	Table Compression and Enterprise Manager Cloud Control	19-18
19.2.7.2	Viewing the Compression Summary at the Database Level	19-19
19.2.7.3	Viewing the Compression Summary at the Tablespace Level	19-19
19.2.7.4	Estimating the Compression Ratio	19-20
19.2.7.5	Compressing an Object	19-20
19.2.7.6	Viewing Compression Advice	19-21
19.2.7.7	Initiating Automatic Data Optimization on an Object	19-21
19.2.8	Consider Using Segment-Level and Row-Level Compression Tiering	19-21
19.2.9	Consider Using Attribute-Clustered Tables	19-23
19.2.10	Consider Using Zone Maps	19-24
19.2.11	Consider Storing Tables in the In-Memory Column Store	19-25
19.2.12	Consider Using Invisible Columns	19-25
19.2.12.1	Understand Invisible Columns	19-25
19.2.12.2	Invisible Columns and Column Ordering	19-26
19.2.13	Consider Encrypting Columns That Contain Sensitive Data	19-28
19.2.14	Understand Deferred Segment Creation	19-29
19.2.15	Materializing Segments	19-32
19.2.16	Estimate Table Size and Plan Accordingly	19-32
19.2.17	Restrictions to Consider When Creating Tables	19-32
19.3	Creating Tables	19-33
19.3.1	Example: Creating a Table	19-34
19.3.2	Creating a Temporary Table	19-35
19.3.2.1	Overview of Temporary Tables	19-35
19.3.2.2	Considerations When Creating Temporary Tables	19-36
19.3.2.3	Creating Global Temporary Tables	19-36
19.3.2.4	Creating Private Temporary Tables	19-38
19.3.3	Parallelizing Table Creation	19-40
19.4	Loading Tables	19-41
19.4.1	Methods for Loading Tables	19-41
19.4.2	Improving INSERT Performance with Direct-Path INSERT	19-43
19.4.2.1	About Direct-Path INSERT	19-43
19.4.2.2	How Direct-Path INSERT Works	19-44
19.4.2.3	Loading Data with Direct-Path INSERT	19-45
19.4.2.4	Logging Modes for Direct-Path INSERT	19-46
19.4.2.5	Additional Considerations for Direct-Path INSERT	19-47
19.4.3	Using Conventional Inserts to Load Tables	19-49
19.4.4	Avoiding Bulk INSERT Failures with DML Error Logging	19-49

19.4.4.1	Inserting Data with DML Error Logging	19-50
19.4.4.2	Error Logging Table Format	19-51
19.4.4.3	Creating an Error Logging Table	19-52
19.4.4.4	Error Logging Restrictions and Caveats	19-53
19.5	Optimizing the Performance of Bulk Updates	19-54
19.6	Automatically Collecting Statistics on Tables	19-55
19.7	Altering Tables	19-56
19.7.1	Reasons for Using the ALTER TABLE Statement	19-57
19.7.2	Altering Physical Attributes of a Table	19-58
19.7.3	Moving a Table to a New Segment or Tablespace	19-58
19.7.3.1	About Moving a Table to a New Segment or Tablespace	19-58
19.7.3.2	Moving a Table	19-59
19.7.3.3	Moving a Table Partition or Subpartition Online	19-60
19.7.4	Manually Allocating Storage for a Table	19-61
19.7.5	Modifying an Existing Column Definition	19-61
19.7.6	Adding Table Columns	19-62
19.7.7	Renaming Table Columns	19-63
19.7.8	Dropping Table Columns	19-63
19.7.8.1	Removing Columns from Tables	19-64
19.7.8.2	Marking Columns Unused	19-65
19.7.8.3	Removing Unused Columns	19-65
19.7.8.4	Dropping Columns in Compressed Tables	19-66
19.7.9	Placing a Table in Read-Only Mode	19-66
19.8	Redefining Tables Online	19-67
19.8.1	About Redefining Tables Online	19-68
19.8.2	Features of Online Table Redefinition	19-69
19.8.3	Privileges Required for the DBMS_REDEFINITION Package	19-71
19.8.4	Restrictions for Online Redefinition of Tables	19-71
19.8.5	Performing Online Redefinition with the REDEF_TABLE Procedure	19-73
19.8.6	Redefining Tables Online with Multiple Procedures in DBMS_REDEFINITION	19-74
19.8.6.1	Performing Online Redefinition with Multiple Procedures in DBMS_REDEFINITION	19-74
19.8.6.2	Constructing a Column Mapping String	19-77
19.8.6.3	Handling Virtual Private Database (VPD) Policies During Online Redefinition	19-78
19.8.6.4	Creating Dependent Objects Automatically	19-79
19.8.6.5	Creating Dependent Objects Manually	19-79
19.8.7	Results of the Redefinition Process	19-80
19.8.8	Performing Intermediate Synchronization	19-81
19.8.9	Refreshing Dependent Materialized Views During Online Table Redefinition	19-81
19.8.10	Monitoring Online Table Redefinition Progress	19-85
19.8.11	Restarting Online Table Redefinition After a Failure	19-88

19.8.12	Rolling Back Online Table Redefinition	19-91
19.8.12.1	About Online Table Redefinition Rollback	19-92
19.8.12.2	Performing Online Table Redefinition Rollback	19-92
19.8.13	Terminating Online Table Redefinition and Cleaning Up After Errors	19-95
19.8.14	Online Redefinition of One or More Partitions	19-96
19.8.14.1	Rules for Online Redefinition of a Single Partition	19-97
19.8.15	Online Table Redefinition Examples	19-98
19.9	Researching and Reversing Erroneous Table Changes	19-119
19.10	Recovering Tables Using Oracle Flashback Table	19-119
19.11	Dropping Tables	19-120
19.12	Using Flashback Drop and Managing the Recycle Bin	19-121
19.12.1	What Is the Recycle Bin?	19-122
19.12.2	Enabling and Disabling the Recycle Bin	19-123
19.12.3	Viewing and Querying Objects in the Recycle Bin	19-124
19.12.4	Purging Objects in the Recycle Bin	19-124
19.12.5	Restoring Tables from the Recycle Bin	19-125
19.13	Managing Index-Organized Tables	19-126
19.13.1	What Are Index-Organized Tables?	19-127
19.13.2	Creating Index-Organized Tables	19-128
19.13.2.1	About Creating Index-Organized Tables	19-128
19.13.2.2	Example: Creating an Index-Organized Table	19-129
19.13.2.3	Restrictions for Index-Organized Tables	19-129
19.13.2.4	Creating Index-Organized Tables That Contain Object Types	19-130
19.13.2.5	Choosing and Monitoring a Threshold Value	19-131
19.13.2.6	Using the INCLUDING Clause	19-131
19.13.2.7	Parallelizing Index-Organized Table Creation	19-132
19.13.2.8	Using Prefix Compression	19-133
19.13.3	Maintaining Index-Organized Tables	19-134
19.13.3.1	Altering Index-Organized Tables	19-134
19.13.3.2	Moving (Rebuilding) Index-Organized Tables	19-134
19.13.4	Creating Secondary Indexes on Index-Organized Tables	19-135
19.13.4.1	About Secondary Indexes on Index-Organized Tables	19-136
19.13.4.2	Creating a Secondary Index on an Index-Organized Table	19-136
19.13.4.3	Maintaining Physical Guesses in Logical Rowids	19-136
19.13.4.4	Specifying Bitmap Indexes on Index-Organized Tables	19-137
19.13.5	Analyzing Index-Organized Tables	19-137
19.13.5.1	Collecting Optimizer Statistics for Index-Organized Tables	19-137
19.13.5.2	Validating the Structure of Index-Organized Tables	19-138
19.13.6	Using the ORDER BY Clause with Index-Organized Tables	19-138
19.13.7	Converting Index-Organized Tables to Regular Tables	19-139
19.14	Managing Partitioned Tables	19-139
19.15	Managing External Tables	19-139

19.15.1	About External Tables	19-140
19.15.2	Creating External Tables	19-142
19.15.3	Altering External Tables	19-146
19.15.4	Preprocessing External Tables	19-147
19.15.5	Overriding Parameters for External Tables in a Query	19-149
19.15.6	Using Inline External Tables	19-149
19.15.7	Partitioning External Tables	19-150
19.15.7.1	About Partitioning External Tables	19-150
19.15.7.2	Restrictions for Partitioned External Tables	19-152
19.15.7.3	Creating a Partitioned External Table	19-153
19.15.7.4	Altering a Partitioned External Table	19-157
19.15.8	Dropping External Tables	19-157
19.15.9	System and Object Privileges for External Tables	19-157
19.15.10	Using SQL*Loader for External Tables with Partition Values in File Paths	19-158
19.16	Managing Hybrid Partitioned Tables	19-158
19.17	Managing Immutable Tables	19-159
19.17.1	About Immutable Tables	19-159
19.17.2	Guidelines for Managing Immutable Tables	19-160
19.17.2.1	Specify the Retention Period for the Immutable Table	19-160
19.17.2.2	Specify the Retention Period for Rows in the Immutable Table	19-161
19.17.2.3	Restrictions for Immutable Tables	19-161
19.17.3	Creating Immutable Tables	19-162
19.17.4	Altering Immutable Tables	19-163
19.17.5	Adding and Dropping User Columns in Immutable Tables	19-163
19.17.6	Creating Row Versions in Immutable Tables	19-164
19.17.7	Deleting Rows from Immutable Tables	19-164
19.17.8	Dropping Immutable Tables	19-165
19.17.9	Immutable Tables Data Dictionary Views	19-165
19.18	Managing Blockchain Tables	19-166
19.18.1	About Blockchain Tables	19-168
19.18.1.1	Benefits of Using Blockchain Tables	19-168
19.18.1.2	Chaining Rows in Blockchain Tables	19-170
19.18.1.3	Hidden Columns in Blockchain Tables	19-171
19.18.2	Guidelines for Managing Blockchain Tables	19-174
19.18.2.1	Specify the Retention Period for the Blockchain Table	19-174
19.18.2.2	Specify the Retention Period for Rows in the Blockchain Table	19-175
19.18.2.3	Exporting and Importing Blockchain Tables with Oracle Data Pump	19-175
19.18.2.4	Restrictions for Blockchain Tables	19-176
19.18.3	Creating Blockchain Tables	19-177
19.18.4	Adding and Dropping User Columns in Blockchain Tables	19-179
19.18.5	Creating Row Versions in Blockchain Tables	19-179
19.18.6	Creating User Chains in Blockchain Tables	19-180

19.18.7	Altering Blockchain Tables	19-181
19.18.8	Adding Certificates Used to Sign Blockchain Table Rows	19-181
19.18.9	Adding the Certificate of a Certificate Authority to the Database	19-182
19.18.10	Deleting Certificates in Blockchain Tables	19-183
19.18.11	Adding a User Signature to Blockchain Table Rows	19-183
19.18.12	Allowing a Delegate to Sign Blockchain Table Rows	19-185
19.18.13	Countersigning Blockchain Table Rows	19-186
19.18.14	Validating Data in Blockchain Tables	19-187
19.18.15	Verifying the Integrity of Blockchain Tables	19-188
19.18.15.1	Generating a Signed Digest for Blockchain Tables	19-189
19.18.15.2	Verifying Blockchain Table Rows Created in a Specified Time Period	19-190
19.18.16	Deleting Rows from Blockchain Tables	19-191
19.18.17	Dropping Blockchain Tables	19-192
19.18.18	Setting the Table Retention Threshold	19-193
19.18.19	Determining the Data Format for Row Content to Compute Row Hash	19-193
19.18.20	Determining the Data Format to Compute Row Signature	19-195
19.18.21	Displaying the Byte Values of Data in Blockchain Tables	19-195
19.18.22	Creating a Regular Table with Blockchain History Log	19-197
19.18.23	Blockchain Tables Data Dictionary Views	19-197
19.19	Tables Data Dictionary Views	19-198

## 20 Managing Indexes

---

20.1	About Indexes	20-1
20.2	Guidelines for Managing Indexes	20-2
20.2.1	Create Indexes After Inserting Table Data	20-3
20.2.2	Index the Correct Tables and Columns	20-4
20.2.3	Order Index Columns for Performance	20-5
20.2.4	Limit the Number of Indexes for Each Table	20-5
20.2.5	Drop Indexes That Are No Longer Required	20-5
20.2.6	Indexes and Deferred Segment Creation	20-6
20.2.7	Estimate Index Size and Set Storage Parameters	20-6
20.2.8	Specify the Tablespace for Each Index	20-7
20.2.9	Consider Parallelizing Index Creation	20-7
20.2.10	Consider Creating Indexes with NOLOGGING	20-7
20.2.11	Understand When to Use Unusable or Invisible Indexes	20-8
20.2.12	Understand When to Create Multiple Indexes on the Same Set of Columns	20-9
20.2.13	Consider Costs and Benefits of Coalescing or Rebuilding Indexes	20-10
20.2.14	Consider Cost Before Disabling or Dropping Constraints	20-11
20.2.15	Consider Using the In-Memory Column Store to Reduce the Number of Indexes	20-11
20.3	Creating Indexes	20-12

20.3.1	Prerequisites for Creating Indexes	20-13
20.3.2	Creating an Index Explicitly	20-13
20.3.3	Creating a Unique Index Explicitly	20-14
20.3.4	Creating an Index Associated with a Constraint	20-14
20.3.4.1	About Creating an Index Associated with a Constraint	20-15
20.3.4.2	Specifying Storage Options for an Index Associated with a Constraint	20-15
20.3.4.3	Specifying the Index Associated with a Constraint	20-15
20.3.5	Creating a Large Index	20-16
20.3.6	Creating an Index Online	20-17
20.3.7	Creating a Function-Based Index	20-17
20.3.8	Creating a Compressed Index	20-18
20.3.8.1	Creating an Index Using Prefix Compression	20-19
20.3.8.2	Creating an Index Using Advanced Index Compression	20-20
20.3.9	Creating an Unusable Index	20-21
20.3.10	Creating an Invisible Index	20-22
20.3.11	Creating Multiple Indexes on the Same Set of Columns	20-23
20.3.12	Creating a Vector Index	20-24
20.4	Altering Indexes	20-24
20.4.1	About Altering Indexes	20-24
20.4.2	Altering Storage Characteristics of an Index	20-25
20.4.3	Rebuilding an Existing Index	20-26
20.4.4	Making an Index Unusable	20-26
20.4.5	Making an Index Invisible or Visible	20-28
20.4.6	Renaming an Index	20-29
20.4.7	Monitoring Index Usage	20-29
20.5	Monitoring Space Use of Indexes	20-30
20.6	Dropping Indexes	20-31
20.7	Managing Automatic Indexes	20-31
20.7.1	About Automatic Indexing	20-32
20.7.2	How Automatic Indexing Works	20-33
20.7.3	Configuring Automatic Indexing in an Oracle Database	20-34
20.7.4	Generating Automatic Indexing Reports	20-38
20.7.5	Views Containing the Automatic Indexing Information	20-40
20.8	Indexes Data Dictionary Views	20-41

## 21 Managing Clusters

---

21.1	About Clusters	21-1
21.2	Guidelines for Managing Clusters	21-3
21.2.1	Choose Appropriate Tables for the Cluster	21-3
21.2.2	Choose Appropriate Columns for the Cluster Key	21-4

21.2.3	Specify the Space Required by an Average Cluster Key and Its Associated Rows	21-4
21.2.4	Specify the Location of Each Cluster and Cluster Index Rows	21-4
21.2.5	Estimate Cluster Size and Set Storage Parameters	21-5
21.3	Creating Clusters and Objects That Use Them	21-5
21.3.1	Creating Clusters	21-5
21.3.2	Creating Clustered Tables	21-6
21.3.3	Creating Cluster Indexes	21-7
21.4	Altering Clusters and Objects That Use Them	21-7
21.4.1	Altering Clusters	21-7
21.4.2	Altering Clustered Tables	21-8
21.4.3	Altering Cluster Indexes	21-8
21.5	Dropping Clusters and Objects That Use Them	21-9
21.5.1	Dropping Clusters	21-9
21.5.2	Dropping Clustered Tables	21-10
21.5.3	Dropping Cluster Indexes	21-10
21.6	Clusters Data Dictionary Views	21-11

## 22 Managing Hash Clusters

---

22.1	About Hash Clusters	22-1
22.2	When to Use Hash Clusters	22-2
22.2.1	Situations Where Hashing Is Useful	22-2
22.2.2	Situations Where Hashing Is Not Advantageous	22-3
22.3	Creating Different Types of Hash Clusters	22-3
22.3.1	Creating Hash Clusters	22-4
22.3.2	Creating a Sorted Hash Cluster	22-4
22.3.3	Creating Single-Table Hash Clusters	22-7
22.3.4	Controlling Space Use Within a Hash Cluster	22-7
22.3.4.1	Choosing the Key	22-8
22.3.4.2	Setting HASH IS	22-8
22.3.4.3	Setting SIZE	22-8
22.3.4.4	Setting HASHKEYS	22-9
22.3.4.5	Controlling Space in Hash Clusters	22-9
22.3.5	Estimating Size Required by Hash Clusters	22-10
22.4	Altering Hash Clusters	22-11
22.5	Dropping Hash Clusters	22-11
22.6	Hash Clusters Data Dictionary Views	22-11

## 23 Managing Views, Sequences, and Synonyms

---

23.1	Managing Views	23-1
------	----------------	------

23.1.1	About Views	23-2
23.1.2	Creating Views and Join Views	23-2
23.1.2.1	Creating Views	23-3
23.1.2.2	Creating Join Views	23-4
23.1.2.3	Expansion of Defining Queries at View Creation Time	23-4
23.1.2.4	Creating Views with Errors	23-5
23.1.3	Replacing Views	23-5
23.1.4	Using Views in Queries	23-6
23.1.5	DML Statements and Join Views	23-7
23.1.5.1	Updating a Join View	23-7
23.1.5.2	Key-Preserved Tables	23-9
23.1.5.3	Rules for DML Statements and Join Views	23-10
23.1.5.4	Updating Views That Involve Outer Joins	23-13
23.1.5.5	Using the UPDATABLE_ COLUMNS Views	23-14
23.1.6	Altering Views	23-15
23.1.7	Dropping Views	23-15
23.2	Managing Sequences	23-16
23.2.1	About Sequences	23-16
23.2.2	Creating Sequences	23-17
23.2.3	Altering Sequences	23-17
23.2.4	Using Sequences	23-18
23.2.4.1	Referencing a Sequence	23-19
23.2.4.2	Caching Sequence Numbers	23-20
23.2.4.3	Making a Sequence Scalable	23-23
23.2.5	Dropping Sequences	23-25
23.3	Managing Synonyms	23-25
23.3.1	About Synonyms	23-26
23.3.2	Creating Synonyms	23-26
23.3.3	Using Synonyms in DML Statements	23-27
23.3.4	Dropping Synonyms	23-27
23.4	Views, Synonyms, and Sequences Data Dictionary Views	23-28

## 24 Repairing Corrupted Data

---

24.1	Options for Repairing Data Block Corruption	24-1
24.2	About the DBMS_REPAIR Package	24-2
24.2.1	DBMS_REPAIR Procedures	24-2
24.2.2	Limitations and Restrictions for DBMS_REPAIR Procedures	24-3
24.3	Using the DBMS_REPAIR Package	24-3
24.3.1	Task 1: Detect and Report Corruptions	24-3
24.3.1.1	About Detecting and Reporting Corruptions	24-4

24.3.1.2	DBMS_REPAIR: Using the CHECK_OBJECT and ADMIN_TABLES Procedures	24-4
24.3.1.3	DB_VERIFY: Performing an Offline Database Check	24-4
24.3.1.4	ANALYZE: Reporting Corruption	24-5
24.3.1.5	DB_BLOCK_CHECKING Initialization Parameter	24-5
24.3.2	Task 2: Evaluate the Costs and Benefits of Using DBMS_REPAIR	24-6
24.3.3	Task 3: Make Objects Usable	24-6
24.3.3.1	Corruption Repair: Using the FIX_CORRUPT_BLOCKS and SKIP_CORRUPT_BLOCKS Procedures	24-7
24.3.3.2	Implications When Skipping Corrupt Blocks	24-7
24.3.4	Task 4: Repair Corruptions and Rebuild Lost Data	24-7
24.3.4.1	Recover Data Using the DUMP_ORPHAN_KEYS Procedures	24-7
24.3.4.2	Fix Segment Bitmaps Using the SEGMENT_FIX_STATUS Procedure	24-7
24.4	DBMS_REPAIR Examples	24-8
24.4.1	Examples: Building a Repair Table or Orphan Key Table	24-8
24.4.1.1	About Repair Tables or Orphan Key Tables	24-8
24.4.1.2	Example: Creating a Repair Table	24-9
24.4.1.3	Example: Creating an Orphan Key Table	24-9
24.4.2	Example: Detecting Corruption	24-10
24.4.3	Example: Fixing Corrupt Blocks	24-11
24.4.4	Example: Finding Index Entries Pointing to Corrupt Data Blocks	24-11
24.4.5	Example: Skipping Corrupt Blocks	24-12

## Part IV Database Resource Management and Task Scheduling

---

### 25 Managing Automated Database Maintenance Tasks

---

25.1	About Automated Maintenance Tasks	25-2
25.2	About Maintenance Windows	25-3
25.3	Configuring Automated Maintenance Tasks	25-4
25.3.1	Enabling and Disabling Maintenance Tasks for all Maintenance Windows	25-4
25.3.2	Enabling and Disabling Maintenance Tasks for Specific Maintenance Windows	25-5
25.4	Configuring Maintenance Windows	25-5
25.4.1	Modifying a Maintenance Window	25-5
25.4.2	Creating a New Maintenance Window	25-6
25.4.3	Removing a Maintenance Window	25-7
25.5	Configuring Resource Allocations for Automated Maintenance Tasks	25-7
25.5.1	About Resource Allocations for Automated Maintenance Tasks	25-8
25.5.2	Changing Resource Allocations for Automated Maintenance Tasks	25-9
25.6	Automated Maintenance Tasks Reference	25-9
25.6.1	Predefined Maintenance Windows	25-9

## 26 Managing Resources with Oracle Database Resource Manager

---

26.1	About Oracle Database Resource Manager	26-2
26.1.1	CDB and PDB Resource Management	26-3
26.1.2	Purpose of Resource Management	26-4
26.1.2.1	Purpose of Resource Management for a CDB	26-4
26.1.2.2	Purpose of Resource Management for PDBs	26-6
26.1.3	Consumer Groups, Plans, and Plan Directives	26-7
26.1.3.1	About the Elements of Resource Manager	26-7
26.1.3.2	About Resource Consumer Groups	26-8
26.1.3.3	About Resource Plan Directives	26-9
26.1.3.4	About Resource Plans	26-20
26.1.3.5	About Subplans	26-29
26.1.4	User Interface for PDB Resource Management	26-30
26.1.4.1	About Resource Manager Administration Privileges	26-31
26.1.4.2	DBMS_RESOURCE_MANAGER for CDBs and PDBs	26-32
26.1.4.3	Initialization Parameters for PDB-Level Resources	26-32
26.2	Enabling Oracle Database Resource Manager and Switching Plans	26-39
26.3	Assigning Sessions to Resource Consumer Groups	26-42
26.3.1	Overview of Assigning Sessions to Resource Consumer Groups	26-42
26.3.2	Assigning an Initial Resource Consumer Group	26-43
26.3.3	Specifying Session-to-Consumer Group Mapping Rules	26-43
26.3.3.1	About Session-to-Consumer Group Mapping Rules	26-43
26.3.3.2	Creating Consumer Group Mapping Rules	26-44
26.3.3.3	Modifying and Deleting Consumer Group Mapping Rules	26-46
26.3.3.4	Creating Mapping Rule Priorities	26-46
26.3.4	Switching Resource Consumer Groups	26-47
26.3.4.1	Manually Switching Resource Consumer Groups	26-48
26.3.4.2	Enabling Users or Applications to Manually Switch Consumer Groups	26-49
26.3.5	Specifying Automatic Consumer Group Switching	26-50
26.3.5.1	Specifying Automatic Switching with Mapping Rules	26-50
26.3.5.2	Specifying Automatic Switching by Setting Resource Limits	26-51
26.3.6	Granting and Revoking the Switch Privilege	26-54
26.3.6.1	About Granting and Revoking the Switch Privilege	26-54
26.3.6.2	Granting the Switch Privilege	26-55
26.3.6.3	Revoking Switch Privileges	26-55
26.4	Managing Resource Plans	26-56
26.4.1	Managing CDB Resource Plans	26-56
26.4.1.1	Creating a CDB Resource Plan for Managing PDBs	26-57
26.4.1.2	Creating a CDB Resource Plan for Managing PDBs: Scenario	26-57

26.4.1.3	Creating a CDB Resource Plan with PDB Performance Profiles	26-60
26.4.1.4	Creating a CDB Resource Plan for PDB Performance Profiles: Scenario	26-61
26.4.1.5	Enabling a CDB Resource Plan	26-64
26.4.1.6	Modifying a CDB Resource Plan	26-64
26.4.1.7	Disabling a CDB Resource Plan	26-76
26.4.1.8	Viewing Information About Plans and Directives in a CDB	26-77
26.4.2	Managing PDB Resource Plans	26-79
26.4.2.1	Creating a PDB Resource Plan	26-79
26.4.2.2	Enabling a PDB Resource Plan	26-80
26.4.2.3	Modifying a PDB Resource Plan	26-81
26.4.2.4	Disabling a PDB Resource Plan	26-82
26.4.3	Creating a Simple Resource Plan	26-82
26.4.4	Creating a Complex Resource Plan	26-84
26.4.4.1	About the Pending Area	26-85
26.4.4.2	Creating a Pending Area	26-86
26.4.4.3	Creating Resource Consumer Groups	26-86
26.4.4.4	Mapping Sessions to Consumer Groups	26-87
26.4.4.5	Creating a Resource Plan	26-88
26.4.4.6	Creating Resource Plan Directives	26-89
26.4.4.7	Validating the Pending Area	26-94
26.4.4.8	Submitting the Pending Area	26-95
26.4.4.9	Clearing the Pending Area	26-96
26.5	Putting It All Together: Oracle Database Resource Manager Examples	26-96
26.5.1	Multilevel Plan Example	26-97
26.5.2	Examples of Using the Utilization Limit Attribute	26-99
26.5.3	Example of Using Several Resource Allocation Methods	26-104
26.5.4	Example of Managing Parallel Statements Using Directive Attributes	26-104
26.5.5	An Oracle-Supplied Mixed Workload Plan	26-107
26.6	Managing Multiple Database Instances on a Single Server	26-108
26.6.1	About Instance Caging	26-108
26.6.2	Enabling Instance Caging	26-109
26.7	Maintaining Consumer Groups, Plans, and Directives	26-109
26.7.1	Updating a Consumer Group	26-110
26.7.2	Deleting a Consumer Group	26-110
26.7.3	Updating a Plan	26-111
26.7.4	Deleting a Plan	26-111
26.7.5	Updating a Resource Plan Directive	26-112
26.7.6	Deleting a Resource Plan Directive	26-113
26.8	Viewing Database Resource Manager Configuration and Status	26-113
26.8.1	About Resource Manager Views	26-114
26.8.2	Viewing Consumer Groups Granted to Users or Roles	26-120
26.8.3	Viewing Plan Information	26-120

26.8.4	Viewing Current Consumer Groups for Sessions	26-121
26.8.5	Viewing the Currently Active Plans	26-121
26.8.6	Monitoring PDBs Managed by Oracle Database Resource Manager	26-121
26.8.6.1	About Resource Manager Views for PDBs	26-122
26.8.6.2	Monitoring CPU Usage for PDBs	26-123
26.8.6.3	Monitoring Parallel Execution for PDBs	26-124
26.8.6.4	Monitoring the I/O Generated by PDBs	26-125
26.8.6.5	Monitoring Memory Usage for PDBs	26-126
26.9	Interacting with Operating-System Resource Control	26-126
26.9.1	Guidelines for Using Operating-System Resource Control	26-126
26.10	Oracle Database Resource Manager Reference	26-127
26.10.1	Predefined Resource Plans and Consumer Groups	26-127
26.10.2	Predefined Consumer Group Mapping Rules	26-129
26.10.3	Resource Manager Data Dictionary Views	26-130
26.11	Operating System CPU Resource Management	26-131

## 27 Oracle Scheduler Concepts

---

27.1	Overview of Oracle Scheduler	27-1
27.2	Jobs and Supporting Scheduler Objects	27-3
27.2.1	About Jobs and Supporting Scheduler Objects	27-4
27.2.2	Programs	27-4
27.2.3	Schedules	27-5
27.2.4	Jobs	27-5
27.2.4.1	About Jobs	27-6
27.2.4.2	Specifying a Job Action	27-6
27.2.4.3	Specifying a Job Schedule	27-6
27.2.4.4	Specifying a Job Destination	27-7
27.2.4.5	Specifying a Job Credential	27-7
27.2.5	Destinations	27-8
27.2.5.1	About Destinations	27-8
27.2.5.2	About Destinations and Scheduler Agents	27-9
27.2.6	File Watchers	27-10
27.2.7	Credentials	27-10
27.2.8	Chains	27-11
27.2.9	Job Classes	27-12
27.2.10	Windows	27-14
27.2.10.1	About Windows	27-14
27.2.10.2	Overlapping Windows	27-15
27.2.11	Groups	27-18
27.2.11.1	About Groups	27-18
27.2.11.2	Destination Groups	27-18

27.2.11.3	Window Groups	27-18
27.2.12	Incompatibilities	27-19
27.3	More About Jobs	27-19
27.3.1	Job Categories	27-20
27.3.1.1	Database Jobs	27-21
27.3.1.2	External Jobs	27-22
27.3.1.3	Multiple-Destination Jobs	27-24
27.3.1.4	Chain Jobs	27-26
27.3.1.5	Detached Jobs	27-26
27.3.1.6	Lightweight Jobs	27-27
27.3.1.7	In-Memory Jobs	27-28
27.3.1.8	Script Jobs	27-28
27.3.2	Job Instances	27-29
27.3.3	Job Arguments	27-30
27.3.4	How Programs, Jobs, and Schedules are Related	27-30
27.4	Scheduler Architecture	27-31
27.4.1	Scheduler Components	27-32
27.4.2	The Job Table	27-32
27.4.3	The Job Coordinator	27-32
27.4.3.1	About The Job Coordinator	27-32
27.4.3.2	Job Coordinator Actions	27-33
27.4.3.3	Maximum Number of Scheduler Job Processes	27-33
27.4.4	How Jobs Execute	27-34
27.4.5	After Jobs Complete	27-35
27.4.6	Using the Scheduler in Real Application Clusters Environments	27-35
27.4.6.1	The Scheduler and Real Application Clusters	27-35
27.4.6.2	Service Affinity when Using the Scheduler	27-36
27.5	Processes to Close a PDB	27-37
27.6	Scheduler Support for Oracle Data Guard	27-37

## 28 Scheduling Jobs with Oracle Scheduler

---

28.1	About Scheduler Objects and Their Naming	28-2
28.2	Creating, Running, and Managing Jobs	28-2
28.2.1	Job Tasks and Their Procedures	28-3
28.2.2	Creating Jobs	28-4
28.2.2.1	Overview of Creating Jobs	28-4
28.2.2.2	Specifying Job Actions, Schedules, Programs, and Styles	28-6
28.2.2.3	Specifying Scheduler Job Credentials	28-9
28.2.2.4	Specifying Destinations	28-10
28.2.2.5	Creating Multiple-Destination Jobs	28-13
28.2.2.6	Setting Job Arguments	28-14

28.2.2.7	Setting Additional Job Attributes	28-15
28.2.2.8	Creating Detached Jobs	28-15
28.2.2.9	Creating Multiple Jobs in a Single Transaction	28-16
28.2.2.10	Techniques for External Jobs	28-17
28.2.3	Altering Jobs	28-19
28.2.4	Running Jobs	28-20
28.2.5	Stopping Jobs	28-20
28.2.6	Stopping External Jobs	28-21
28.2.7	Stopping a Chain Job	28-22
28.2.8	Dropping Jobs	28-22
28.2.9	Dropping Running Jobs	28-22
28.2.10	Dropping Multiple Jobs	28-22
28.2.11	Disabling Jobs	28-23
28.2.12	Enabling Jobs	28-24
28.2.13	Copying Jobs	28-25
28.3	Creating and Managing Programs to Define Jobs	28-25
28.3.1	Program Tasks and Their Procedures	28-25
28.3.2	Creating Programs with Scheduler	28-26
28.3.2.1	Creating Programs	28-26
28.3.2.2	Defining Program Arguments	28-26
28.3.3	Altering Programs	28-28
28.3.4	Dropping Programs	28-28
28.3.5	Disabling Programs	28-28
28.3.6	Enabling Programs	28-29
28.4	Creating and Managing Schedules to Define Jobs	28-29
28.4.1	Schedule Tasks and Their Procedures	28-30
28.4.2	Creating Schedules	28-30
28.4.3	Altering Schedules	28-31
28.4.4	Dropping Schedules	28-31
28.4.5	Setting the Repeat Interval	28-31
28.4.5.1	About Setting the Repeat Interval	28-32
28.4.5.2	Using the Scheduler Calendaring Syntax	28-32
28.4.5.3	Using a PL/SQL Expression	28-35
28.4.5.4	Differences Between PL/SQL Expression and Calendaring Syntax Behavior	28-35
28.4.5.5	Repeat Intervals and Daylight Savings	28-36
28.5	Using Events to Start Jobs	28-36
28.5.1	About Events	28-37
28.5.2	Starting Jobs with Events Raised by Your Application	28-37
28.5.2.1	About Events Raised by Your Application	28-38
28.5.2.2	Creating an Event-Based Job	28-39
28.5.2.3	Altering an Event-Based Job	28-40

28.5.2.4	Creating an Event Schedule	28-40
28.5.2.5	Altering an Event Schedule	28-41
28.5.2.6	Passing Event Messages into an Event-Based Job	28-41
28.5.3	Starting a Job When a File Arrives on a System	28-42
28.5.3.1	About File Watchers	28-43
28.5.3.2	Enabling File Arrival Events from Remote Systems	28-44
28.5.3.3	Creating File Watchers and File Watcher Jobs	28-44
28.5.3.4	File Arrival Example	28-47
28.5.3.5	Managing File Watchers	28-48
28.5.3.6	Viewing File Watcher Information	28-49
28.6	Creating and Managing Job Chains	28-50
28.6.1	About Creating and Managing Job Chains	28-51
28.6.2	Chain Tasks and Their Procedures	28-52
28.6.3	Creating Chains	28-53
28.6.4	Defining Chain Steps	28-53
28.6.5	Adding Rules to a Chain	28-55
28.6.6	Setting an Evaluation Interval for Chain Rules	28-58
28.6.7	Enabling Chains	28-58
28.6.8	Creating Jobs for Chains	28-59
28.6.9	Dropping Chains	28-60
28.6.10	Running Chains	28-60
28.6.11	Dropping Chain Rules	28-61
28.6.12	Disabling Chains	28-61
28.6.13	Dropping Chain Steps	28-61
28.6.14	Stopping Chains	28-62
28.6.15	Stopping Individual Chain Steps	28-62
28.6.16	Pausing Chains	28-62
28.6.17	Skipping Chain Steps	28-63
28.6.18	Running Part of a Chain	28-64
28.6.19	Monitoring Running Chains	28-64
28.6.20	Handling Stalled Chains	28-65
28.7	Using Incompatibility Definitions	28-65
28.7.1	Creating a Job or Program Incompatibility	28-66
28.7.2	Adding a Job or Program to an Incompatibility	28-66
28.7.3	Removing a Job or Program from an Incompatibility	28-67
28.7.4	Dropping an Incompatibility	28-67
28.8	Managing Job Resources	28-68
28.8.1	Creating or Dropping a Resource	28-68
28.8.2	Altering a Resource	28-69
28.8.3	Setting a Resource Constraint for a Job	28-69
28.9	Prioritizing Jobs	28-70
28.9.1	Managing Job Priorities with Job Classes	28-71

28.9.1.1	Job Class Tasks and Their Procedures	28-71
28.9.1.2	Creating Job Classes	28-72
28.9.1.3	Altering Job Classes	28-72
28.9.1.4	Dropping Job Classes	28-72
28.9.2	Setting Relative Job Priorities Within a Job Class	28-73
28.9.3	Managing Job Scheduling and Job Priorities with Windows	28-73
28.9.3.1	About Job Scheduling and Job Priorities with Windows	28-74
28.9.3.2	Window Tasks and Their Procedures	28-75
28.9.3.3	Creating Windows	28-75
28.9.3.4	Altering Windows	28-76
28.9.3.5	Opening Windows	28-76
28.9.3.6	Closing Windows	28-77
28.9.3.7	Dropping Windows	28-78
28.9.3.8	Disabling Windows	28-78
28.9.3.9	Enabling Windows	28-79
28.9.4	Managing Job Scheduling and Job Priorities with Window Groups	28-79
28.9.4.1	Window Group Tasks and Their Procedures	28-80
28.9.4.2	Creating Window Groups	28-80
28.9.4.3	Dropping Window Groups	28-81
28.9.4.4	Adding a Member to a Window Group	28-81
28.9.4.5	Removing a Member from a Window Group	28-81
28.9.4.6	Enabling a Window Group	28-82
28.9.4.7	Disabling a Window Group	28-82
28.9.5	Allocating Resources Among Jobs Using Resource Manager	28-82
28.9.6	Example of Resource Allocation for Jobs	28-83
28.10	Monitoring Jobs	28-84
28.10.1	About Monitoring Jobs	28-84
28.10.2	The Job Log	28-84
28.10.2.1	Viewing the Job Log	28-85
28.10.2.2	Run Details	28-86
28.10.2.3	Precedence of Logging Levels in Jobs and Job Classes	28-86
28.10.3	Monitoring Multiple Destination Jobs	28-87
28.10.4	Monitoring Job State with Events Raised by the Scheduler	28-88
28.10.4.1	About Job State Events	28-88
28.10.4.2	Altering a Job to Raise Job State Events	28-90
28.10.4.3	Consuming Job State Events with your Application	28-90
28.10.5	Monitoring Job State with E-mail Notifications	28-91
28.10.5.1	About E-mail Notifications	28-91
28.10.5.2	Adding E-mail Notifications for a Job	28-92
28.10.5.3	Removing E-mail Notifications for a Job	28-93
28.10.5.4	Viewing Information About E-mail Notifications	28-94

## 29 Administering Oracle Scheduler

---

29.1	Configuring Oracle Scheduler	29-2
29.1.1	Setting Oracle Scheduler Privileges	29-2
29.1.2	Setting Scheduler Preferences	29-3
29.1.3	Using the Oracle Scheduler Agent to Run Remote Jobs	29-5
29.1.3.1	Enabling and Disabling Databases for Remote Jobs	29-6
29.1.3.2	Installing and Configuring the Scheduler Agent on a Remote Host	29-9
29.1.3.3	Performing Tasks with the Scheduler Agent	29-10
29.2	Monitoring and Managing the Scheduler	29-13
29.2.1	Viewing the Currently Active Window and Resource Plan	29-13
29.2.2	Finding Information About Currently Running Jobs	29-13
29.2.3	Monitoring and Managing Window and Job Logs	29-15
29.2.3.1	Job Log	29-15
29.2.3.2	Window Log	29-16
29.2.3.3	Purging Logs	29-17
29.2.4	DBMS_SCHEDULER In-Memory Trace	29-18
29.2.5	Managing Scheduler Security	29-20
29.3	Import/Export and the Scheduler	29-20
29.4	Troubleshooting the Scheduler	29-21
29.4.1	A Job Does Not Run	29-21
29.4.1.1	About Job States	29-21
29.4.1.2	Viewing the Job Log	29-22
29.4.1.3	Troubleshooting Remote Jobs	29-22
29.4.1.4	About Job Recovery After a Failure	29-23
29.4.2	A Program Becomes Disabled	29-24
29.4.3	A Window Fails to Take Effect	29-24
29.5	Examples of Using the Scheduler	29-24
29.5.1	Examples of Creating Job Classes	29-24
29.5.2	Examples of Setting Attributes	29-25
29.5.3	Examples of Creating Chains	29-27
29.5.4	Examples of Creating Jobs and Schedules Based on Events	29-28
29.5.5	Example of Creating a Job In an Oracle Data Guard Environment	29-29
29.6	Scheduler Reference	29-30
29.6.1	Scheduler Privileges	29-30
29.6.2	Scheduler Data Dictionary Views	29-32

## 30 Managing Transactions

---

30.1	Priority Transactions	30-1
30.1.1	Using Priority Transactions	30-2
30.1.1.1	Setting Transaction Priority	30-2

30.1.1.2	Setting System-Level Wait Targets	30-3
30.1.1.3	Acknowledging the Automatic Rollback	30-4
30.1.1.4	Setting Priority Transaction Mode	30-4
30.1.1.5	Using Priority Transaction Mode to Determine System-Level Wait Targets	30-5
30.1.2	Monitoring Priority Transactions	30-6
30.1.2.1	Statistics Incremented in ROLLBACK Mode	30-6
30.1.2.2	Statistics Incremented in TRACK Mode	30-7
30.1.3	Priority Transaction Behavior	30-7
30.1.3.1	Behavior of Priority Transactions for Distributed Transactions	30-7
30.1.3.2	Behavior for XA Transactions	30-8
30.1.4	Priority Transaction Restrictions	30-8
30.2	Automatic Transaction Quarantine	30-8
30.2.1	Monitoring Quarantined Transactions	30-11
30.2.2	Resolving Quarantined Transactions	30-12
30.2.3	Dropping Quarantined Transactions	30-13
30.2.4	Transaction Quarantine Escalation	30-13

## Part V Distributed Database Management

---

### 31 Distributed Database Concepts

---

31.1	Distributed Database Architecture	31-1
31.1.1	Homogenous Distributed Database Systems	31-2
31.1.1.1	About Homogenous Distributed Database Systems	31-2
31.1.1.2	Distributed Databases Versus Distributed Processing	31-3
31.1.1.3	Distributed Databases Versus Replicated Databases	31-4
31.1.2	Heterogeneous Distributed Database Systems	31-4
31.1.2.1	About Heterogeneous Distributed Database Systems	31-5
31.1.2.2	Heterogeneous Services	31-5
31.1.2.3	Transparent Gateway Agents	31-5
31.1.2.4	Generic Connectivity	31-6
31.1.3	Client/Server Database Architecture	31-6
31.2	Database Links	31-7
31.2.1	What Are Database Links?	31-8
31.2.2	What Are Shared Database Links?	31-9
31.2.3	Why Use Database Links?	31-10
31.2.4	Global Database Names in Database Links	31-10
31.2.5	Global Name as a Loopback Database Link	31-12
31.2.6	Names for Database Links	31-12
31.2.7	Types of Database Links	31-13
31.2.8	Users of Database Links	31-14

31.2.8.1	Overview of Database Link Users	31-14
31.2.8.2	Connected User Database Links	31-15
31.2.8.3	Fixed User Database Links	31-16
31.2.8.4	Current User Database Links	31-16
31.2.9	Creation of Database Links: Examples	31-17
31.2.10	Schema Objects and Database Links	31-18
31.2.10.1	Naming of Schema Objects Using Database Links	31-19
31.2.10.2	Authorization for Accessing Remote Schema Objects	31-19
31.2.10.3	Synonyms for Schema Objects	31-19
31.2.10.4	Schema Object Name Resolution	31-20
31.2.11	Database Link Restrictions	31-20
31.3	Distributed Database Administration	31-21
31.3.1	Site Autonomy	31-22
31.3.2	Distributed Database Security	31-22
31.3.2.1	Authentication Through Database Links	31-23
31.3.2.2	Authentication Without Passwords	31-24
31.3.2.3	Supporting User Accounts and Roles	31-24
31.3.2.4	Centralized User and Privilege Management	31-25
31.3.2.5	Data Encryption	31-28
31.3.3	Auditing Database Links	31-29
31.3.4	Administration Tools	31-30
31.3.4.1	Cloud Control and Distributed Databases	31-30
31.3.4.2	Third-Party Administration Tools	31-30
31.3.4.3	SNMP Support	31-30
31.4	Transaction Processing in a Distributed System	31-31
31.4.1	Remote SQL Statements	31-32
31.4.2	Distributed SQL Statements	31-32
31.4.3	Shared SQL for Remote and Distributed Statements	31-33
31.4.4	Remote Transactions	31-33
31.4.5	Distributed Transactions	31-33
31.4.6	Two-Phase Commit Mechanism	31-34
31.4.7	Database Link Name Resolution	31-34
31.4.7.1	About Database Link Name Resolution	31-35
31.4.7.2	Name Resolution When the Global Database Name Is Complete	31-35
31.4.7.3	Name Resolution When the Global Database Name Is Partial	31-35
31.4.7.4	Name Resolution When No Global Database Name Is Specified	31-36
31.4.7.5	Terminating the Search for Name Resolution	31-36
31.4.8	Schema Object Name Resolution	31-37
31.4.8.1	About Schema Object Name Resolution	31-37
31.4.8.2	Example of Global Object Name Resolution: Complete Object Name	31-37
31.4.8.3	Example of Global Object Name Resolution: Partial Object Name	31-38
31.4.9	Global Name Resolution in Views, Synonyms, and Procedures	31-39

31.4.9.1	About Global Name Resolution in Views, Synonyms, and Procedures	31-39
31.4.9.2	What Happens When Global Names Change	31-40
31.4.9.3	Scenarios for Global Name Changes	31-40
31.5	Distributed Database Application Development	31-41
31.5.1	Transparency in a Distributed Database System	31-42
31.5.1.1	Location Transparency	31-42
31.5.1.2	SQL and COMMIT Transparency	31-43
31.5.2	PL/SQL and Remote Procedure Calls (RPCs)	31-43
31.5.3	Distributed Query Optimization	31-44
31.6	Character Set Support for Distributed Environments	31-44
31.6.1	About Character Set Support for Distributed Environments	31-45
31.6.2	Client/Server Environment	31-45
31.6.3	Homogeneous Distributed Environment	31-46
31.6.4	Heterogeneous Distributed Environment	31-46

## 32 Managing a Distributed Database

---

32.1	Managing Global Names in a Distributed System	32-1
32.1.1	Understanding How Global Database Names Are Formed	32-2
32.1.2	Determining Whether Global Naming Is Enforced	32-2
32.1.3	Viewing a Global Database Name	32-3
32.1.4	Changing the Domain in a Global Database Name	32-3
32.1.5	Changing a Global Database Name: Scenario	32-4
32.2	Creating Database Links	32-6
32.2.1	Obtaining Privileges Necessary for Creating Database Links	32-7
32.2.2	Specifying Link Types	32-7
32.2.2.1	Creating Private Database Links	32-8
32.2.2.2	Creating Public Database Links	32-8
32.2.2.3	Creating Global Database Links	32-9
32.2.3	Specifying Link Users	32-9
32.2.3.1	Creating Fixed User Database Links	32-10
32.2.3.2	Creating Connected User and Current User Database Links	32-10
32.2.4	Using Connection Qualifiers to Specify Service Names Within Link Names	32-11
32.3	Using Shared Database Links	32-12
32.3.1	Determining Whether to Use Shared Database Links	32-13
32.3.2	Creating Shared Database Links	32-14
32.3.3	Configuring Shared Database Links	32-14
32.3.3.1	Creating Shared Links to Dedicated Servers	32-14
32.3.3.2	Creating Shared Links to Shared Servers	32-15
32.4	Managing Database Links	32-16
32.4.1	Closing Database Links	32-17
32.4.2	Dropping Database Links	32-17

32.4.2.1	Dropping a Private Database Link	32-17
32.4.2.2	Dropping a Public Database Link	32-18
32.4.3	Limiting the Number of Active Database Link Connections	32-18
32.5	Viewing Information About Database Links	32-19
32.5.1	Determining Which Links Are in the Database	32-19
32.5.2	Determining Which Link Connections Are Open	32-20
32.5.3	Determining the Host of Outgoing Database Links	32-21
32.5.4	Determining Information About Incoming Database Links	32-22
32.5.5	Determining the Source of High SCN Activity for Incoming Database Links	32-23
32.6	Creating Location Transparency	32-24
32.6.1	Using Views to Create Location Transparency	32-24
32.6.2	Using Synonyms to Create Location Transparency	32-25
32.6.2.1	Creating Synonyms	32-26
32.6.2.2	Managing Privileges and Synonyms	32-27
32.6.3	Using Procedures to Create Location Transparency	32-27
32.6.3.1	Using Local Procedures to Reference Remote Data	32-28
32.6.3.2	Using Local Procedures to Call Remote Procedures	32-28
32.6.3.3	Using Local Synonyms to Reference Remote Procedures	32-29
32.6.3.4	Managing Procedures and Privileges	32-29
32.7	Managing Statement Transparency	32-29
32.8	Managing a Distributed Database: Examples	32-31
32.8.1	Example 1: Creating a Public Fixed User Database Link	32-31
32.8.2	Example 2: Creating a Public Fixed User Shared Database Link	32-31
32.8.3	Example 3: Creating a Public Connected User Database Link	32-32
32.8.4	Example 4: Creating a Public Connected User Shared Database Link	32-32
32.8.5	Example 5: Creating a Public Current User Database Link	32-33

## 33 Developing Applications for a Distributed Database System

---

33.1	Managing the Distribution of Application Data	33-1
33.2	Controlling Connections Established by Database Links	33-2
33.3	Maintaining Referential Integrity in a Distributed System	33-2
33.4	Tuning Distributed Queries	33-3
33.4.1	Using Collocated Inline Views	33-4
33.4.2	Using Cost-Based Optimization	33-4
33.4.2.1	How Does Cost-Based Optimization Work?	33-5
33.4.2.2	Rewriting Queries for Cost-Based Optimization	33-5
33.4.2.3	Setting Up Cost-Based Optimization	33-6
33.4.3	Using Hints	33-7
33.4.3.1	About Using Hints	33-7
33.4.3.2	Using the NO_MERGE Hint	33-8
33.4.3.3	Using the DRIVING_SITE Hint	33-8

33.4.4	Analyzing the Execution Plan	33-8
33.4.4.1	Generating the Execution Plan	33-9
33.4.4.2	Viewing the Execution Plan	33-9
33.5	Handling Errors in Remote Procedures	33-10

## 34 Distributed Transactions Concepts

---

34.1	What Are Distributed Transactions?	34-1
34.1.1	DML and DDL Transactions	34-2
34.1.2	Transaction Control Statements	34-3
34.2	Session Trees for Distributed Transactions	34-3
34.2.1	About Session Trees for Distributed Transactions	34-3
34.2.2	Clients	34-4
34.2.3	Database Servers	34-5
34.2.4	Local Coordinators	34-5
34.2.5	Global Coordinator	34-5
34.2.6	Commit Point Site	34-5
34.2.6.1	About the Commit Point Site	34-6
34.2.6.2	How a Distributed Transaction Commits	34-7
34.2.6.3	Commit Point Strength	34-7
34.3	Two-Phase Commit Mechanism	34-9
34.3.1	About the Two-Phase Commit Mechanism	34-9
34.3.2	Prepare Phase	34-10
34.3.2.1	About Prepare Phase	34-10
34.3.2.2	Types of Responses in the Prepare Phase	34-10
34.3.2.3	Steps in the Prepare Phase	34-12
34.3.3	Commit Phase	34-12
34.3.3.1	Steps in the Commit Phase	34-13
34.3.3.2	Guaranteeing Global Database Consistency	34-13
34.3.4	Forget Phase	34-14
34.4	In-Doubt Transactions	34-14
34.4.1	About In-Doubt Transactions	34-14
34.4.2	Automatic Resolution of In-Doubt Transactions	34-15
34.4.2.1	Failure During the Prepare Phase	34-15
34.4.2.2	Failure During the Commit Phase	34-16
34.4.3	Manual Resolution of In-Doubt Transactions	34-17
34.4.4	Relevance of System Change Numbers for In-Doubt Transactions	34-17
34.5	Distributed Transaction Processing: Case Study	34-18
34.5.1	About the Distributed Transaction Processing Case Study	34-18
34.5.2	Stage 1: Client Application Issues DML Statements	34-18
34.5.3	Stage 2: Oracle Database Determines Commit Point Site	34-19
34.5.4	Stage 3: Global Coordinator Sends Prepare Response	34-20

34.5.5	Stage 4: Commit Point Site Commits	34-21
34.5.6	Stage 5: Commit Point Site Informs Global Coordinator of Commit	34-21
34.5.7	Stage 6: Global and Local Coordinators Tell All Nodes to Commit	34-21
34.5.8	Stage 7: Global Coordinator and Commit Point Site Complete the Commit	34-22

## 35 Managing Distributed Transactions

---

35.1	Specifying the Commit Point Strength of a Node	35-2
35.2	Naming Transactions	35-2
35.3	Viewing Information About Distributed Transactions	35-3
35.3.1	Determining the ID Number and Status of Prepared Transactions	35-3
35.3.2	Tracing the Session Tree of In-Doubt Transactions	35-5
35.4	Deciding How to Handle In-Doubt Transactions	35-6
35.4.1	Discovering Problems with a Two-Phase Commit	35-6
35.4.2	Determining Whether to Perform a Manual Override	35-7
35.4.3	Analyzing the Transaction Data	35-7
35.4.3.1	Find a Node that Committed or Rolled Back	35-8
35.4.3.2	Look for Transaction Comments	35-8
35.4.3.3	Look for Transaction Advice	35-8
35.5	Manually Overriding In-Doubt Transactions	35-9
35.5.1	Manually Committing an In-Doubt Transaction	35-9
35.5.1.1	Privileges Required to Commit an In-Doubt Transaction	35-9
35.5.1.2	Committing Using Only the Transaction ID	35-9
35.5.1.3	Committing Using an SCN	35-10
35.5.2	Manually Rolling Back an In-Doubt Transaction	35-10
35.6	Purging Pending Rows from the Data Dictionary	35-11
35.6.1	About Purging Pending Rows from the Data Dictionary	35-11
35.6.2	Executing the PURGE_LOST_DB_ENTRY Procedure	35-12
35.6.3	Determining When to Use DBMS_TRANSACTION	35-12
35.7	Manually Committing an In-Doubt Transaction: Example	35-13
35.7.1	Step 1: Record User Feedback	35-14
35.7.2	Step 2: Query DBA_2PC_PENDING	35-14
35.7.2.1	Determining the Global Transaction ID	35-15
35.7.2.2	Determining the State of the Transaction	35-15
35.7.2.3	Looking for Comments or Advice	35-15
35.7.3	Step 3: Query DBA_2PC_NEIGHBORS on Local Node	35-16
35.7.3.1	Obtaining Database Role and Database Link Information	35-16
35.7.3.2	Determining the Commit Point Site	35-17
35.7.4	Step 4: Querying Data Dictionary Views on All Nodes	35-17
35.7.4.1	Checking the Status of Pending Transactions at sales	35-17
35.7.4.2	Determining the Coordinators and Commit Point Site at sales	35-18
35.7.4.3	Checking the Status of Pending Transactions at HQ	35-19

35.7.5	Step 5: Commit the In-Doubt Transaction	35-19
35.7.6	Step 6: Check for Mixed Outcome Using DBA_2PC_PENDING	35-20
35.8	Data Access Failures Due to Locks	35-20
35.8.1	Transaction Timeouts	35-20
35.8.2	Locks from In-Doubt Transactions	35-21
35.9	Simulating Distributed Transaction Failure	35-21
35.9.1	Forcing a Distributed Transaction to Fail	35-21
35.9.2	Disabling and Enabling RECO	35-22
35.10	Managing Read Consistency	35-23
35.11	Enhancing Distributed Transaction Security	35-23

## Part VI Managing Read-Only Materialized Views

---

### 36 Read-Only Materialized View Concepts

---

36.1	Replication Databases	36-1
36.2	Read-Only Materialized Views	36-2
36.3	The Uses of Materialized Views	36-3
36.3.1	Ease Network Loads	36-3
36.3.2	Enable Data Subsetting	36-3
36.3.3	Enable Disconnected Computing	36-3
36.4	Available Materialized Views	36-4
36.4.1	About the Available Materialized Views	36-4
36.4.2	Primary Key Materialized Views	36-4
36.4.3	Object Materialized Views	36-5
36.4.4	ROWID Materialized Views	36-6
36.4.5	Complex Materialized Views	36-6
36.4.5.1	About Complex Materialized Views	36-6
36.4.5.2	A Comparison of Simple and Complex Materialized Views	36-8
36.5	Users and Privileges Related to Materialized Views	36-9
36.5.1	Required Privileges for Materialized View Operations	36-10
36.5.2	Creator Is Owner	36-11
36.5.3	Creator Is Not Owner	36-11
36.5.4	Refresher Is Owner	36-11
36.5.5	Refresher Is Not Owner	36-12
36.6	Data Subsetting with Materialized Views	36-12
36.6.1	About Data Subsetting with Materialized Views	36-12
36.6.2	Materialized Views with Subqueries	36-13
36.6.2.1	Many to One Subqueries	36-13
36.6.2.2	One to Many Subqueries	36-14
36.6.2.3	Many to Many Subqueries	36-15

36.6.2.4	Materialized Views with Subqueries and Unions	36-16
36.6.3	Restrictions for Materialized Views with Subqueries	36-19
36.6.4	Restrictions for Materialized Views with Unions Containing Subqueries	36-20
36.6.4.1	Examples of Materialized Views with Unions Containing Subqueries	36-20
36.7	Materialized View Refresh	36-21
36.8	Refresh Groups	36-21
36.9	Materialized View Log	36-21
36.10	Materialized Views and User-Defined Data Types	36-22
36.10.1	How Materialized Views Work with Object Types and Collections	36-22
36.10.2	Type Agreement at Replication Databases	36-23
36.10.3	Column Subsetting of Masters with Column Objects	36-24
36.10.4	Materialized Views Based on Object Tables	36-25
36.10.4.1	About Materialized Views Based on Object Tables	36-25
36.10.4.2	Materialized Views Based on Object Tables Created Without Using the OF type Clause	36-25
36.10.4.3	OID Preservation in Object Materialized Views	36-26
36.10.5	Materialized Views with Collection Columns	36-26
36.10.5.1	Restrictions for Materialized Views with Collection Columns	36-28
36.10.6	Materialized Views with REF Columns	36-28
36.10.6.1	About Materialized Views with REF Columns	36-28
36.10.6.2	Scoped REF Columns	36-29
36.10.6.3	Unscoped REF Columns	36-30
36.10.6.4	Logging REF Columns in the Materialized View Log	36-30
36.10.6.5	REFs Created Using the WITH ROWID Clause	36-30
36.11	Materialized View Registration at a Master Database	36-30
36.11.1	Viewing Information about Registered Materialized Views	36-31
36.11.2	Internal Mechanisms	36-31
36.11.3	Manual Materialized View Registration	36-31

## 37 Read-Only Materialized View Architecture

---

37.1	Master Database Mechanisms	37-1
37.1.1	Master Database Objects	37-1
37.1.2	Master Table	37-2
37.1.3	Internal Trigger for the Materialized View Log	37-2
37.1.4	Materialized View Logs	37-2
37.1.4.1	About Materialized View Logs	37-3
37.1.4.2	Columns Logged in the Materialized View Log	37-4
37.1.4.3	Restriction on Import of Materialized View Logs to a Different Schema	37-5
37.2	Materialized View Database Mechanisms	37-5
37.2.1	Indexes for Materialized Views	37-6
37.3	Organizational Mechanisms	37-6

37.3.1	Refresh Groups	37-6
37.3.2	Refresh Group Size	37-6
37.4	Refresh Process	37-7
37.4.1	About the Refresh Process	37-7
37.4.2	Refresh Types	37-7
37.4.2.1	Complete Refresh	37-8
37.4.2.2	Fast Refresh	37-8
37.4.2.3	Force Refresh	37-9
37.4.3	Initiating a Refresh	37-9
37.4.3.1	Scheduled Refresh	37-9
37.4.3.2	On-Demand Refresh	37-10
37.4.4	Constraints and Refresh	37-11

## 38 Planning for Read-Only Materialized Views

---

38.1	Considerations for Master Tables	38-1
38.1.1	Primary Keys and Master Tables	38-1
38.1.2	Foreign Keys and Master Tables	38-1
38.1.3	Data Type Considerations for Master Tables	38-1
38.1.4	Unsupported Table Types	38-3
38.2	Planning for Master Databases and Materialized View Databases	38-3
38.2.1	Characteristics of Master Databases and Materialized View Databases	38-4
38.2.2	Advantages of Master Databases	38-4
38.2.3	Advantages of Materialized View Databases	38-4
38.2.4	Preparing for Materialized Views	38-4
38.2.4.1	Required Schemas at Materialized View Database	38-5
38.2.4.2	Required Database Links for Materialized Views	38-5
38.2.4.3	Required Privileges	38-7
38.2.4.4	Sufficient Job Processes	38-7
38.2.5	Creating Materialized View Logs	38-8
38.2.6	Logging Columns in a Materialized View Log	38-9

## 39 Creating and Managing Read-Only Materialized Views

---

39.1	Creating Read-Only Materialized Views	39-1
39.2	Creating Refresh Groups	39-3
39.3	Refreshing Materialized Views	39-4
39.4	Determining the Fast Refresh Capabilities of a Materialized View	39-5
39.5	Adding a New Materialized View Database	39-6
39.6	Monitoring Materialized View Logs	39-7
39.6.1	Listing Information About the Materialized View Logs at a Master Database	39-7
39.6.2	Listing the Materialized Views that Use a Materialized View Log	39-8

39.7	Monitoring Materialized Views	39-9
39.7.1	Listing Information About Materialized Views	39-9
39.7.1.1	Listing Master Database Information For Materialized Views	39-9
39.7.1.2	Listing the Properties of Materialized Views	39-10
39.7.2	Listing Information About the Refresh Groups at a Materialized View Database	39-11
39.7.3	Determining the Job ID for Each Refresh Job at a Materialized View Database	39-12
39.7.4	Determining Which Materialized Views Are Currently Refreshing	39-12

## 40 Troubleshooting Problems with Read-Only Materialized Views

---

40.1	Diagnosing Problems with Database Links	40-1
40.2	Problems Creating Materialized Views	40-2
40.3	Refresh Problems	40-2
40.3.1	Common Refresh Problems	40-2
40.3.2	Automatic Refresh Retries	40-3
40.3.3	Fast Refresh Errors at New Materialized View Databases	40-3
40.3.4	Materialized Views Continually Refreshing	40-4
40.3.5	Materialized View Logs Growing Too Large	40-4
40.4	Advanced Troubleshooting of Refresh Problems	40-4

## Part VII Appendixes

---

### A Support for DBMS\_JOB

---

A.1	Oracle Scheduler Replaces DBMS_JOB	A-1
A.1.1	Configuring DBMS_JOB	A-2
A.1.2	Using Both DBMS_JOB and Oracle Scheduler	A-2
A.2	Moving from DBMS_JOB to Oracle Scheduler	A-2
A.2.1	Creating a Job	A-3
A.2.2	Altering a Job	A-3
A.2.3	Removing a Job from the Job Queue	A-4

### B Blockchain Tables Reference

---

B.1	Blockchain Tables Column Content	B-1
B.2	Blockchain Tables Row Content	B-3
B.3	Format of the Signed Digest in Blockchain Tables	B-4

### Index

---

# Preface

This document describes how to create and configure CDBs, PDBs, and application containers.

- [Audience](#)
- [Documentation Accessibility](#)
- [Related Documents](#)
- [Conventions](#)

## Audience

This document explains how to administer containers as containers, for example, how to create CDBs and PDBs, start them up and shut them down, and perform cross-container operations. Specifically, this document is intended for database administrators who perform the following tasks:

- Create CDBs, PDBs, and application containers
- Relocate, unplug, and plug in PDBs and application containers
- Install and maintain applications in application containers
- Perform cross-container operations

### Note:

*Oracle Database Administrator's Guide* describes traditional administrative tasks that you perform within an existing container, including managing database storage, schema objects, resources, and task scheduling.

To use this document, you must be familiar with relational database concepts. You must also be familiar with the operating system environment under which you are running Oracle Database.

## Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

### Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

## Related Documents

Many of the examples in this book use the sample schemas. See *Oracle Database Sample Schemas* for information about these schemas.

## Conventions

The following text conventions are used in this document:

Convention	Meaning
<b>boldface</b>	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.
