

# Part III

## Relational Data To and From XML Data

There are various ways that you can view existing relational data as XML data.

- [Generation of XML Data from Relational Data](#)  
Oracle XML DB provides features for generating (constructing) XML data from relational data in the database. There are both SQL/XML standard functions and Oracle-specific functions and packages for generating XML data from relational content.
- [Relational Views over XML Data](#)  
Relational database views over XML data provide conventional, relational access to XML content.
- [XMLType Views](#)  
You can create `XMLType` views over relational and object-relational data.
