

Part VII

Oracle Database Administration and Application Development

This part describes summarizes topics that are essential for database administrators and application developers.

- [Topics for Database Administrators and Developers](#)
This chapter summarizes common database topics that are important for both database administrators and developers, and provides pointers to other manuals, not an exhaustive account of database features.
- [Artificial Intelligence in the Oracle Database](#)
This chapter describes the artificial intelligence features provided in the Oracle Database.
- [Concepts for Database Administrators](#)
This part describes the duties, tools, and essential knowledge for database administrators.
- [Concepts for Database Developers](#)
The Oracle Database developer creates and maintains a database application. This section presents a brief overview of what a database developer does and the development tools available.
