## Index

A	debugpoints (continued)
acuma/await interface 6 11	specifying, 9-2
async/await interface, 6-11	deleting a collection  See dropping a collection
_	dictionary views
В	USER_MLE_ENVS view, 3-20
bind variables	USER_MLE_ENVS_IMPORTS view, 3-20
IN, 7-11	USER MLE MODULES view, 3-13
IN OUT, 7-11	USER SOURCE view, 3-12
OUT, 7-11	Direct Fetch, 7-6
built-in modules, 7-32	arrays, 7-7
accessing, 6-11	objects, 7-8
mle-encode-base64, 3-11	documents
mle-js-bindings, 3-11	creating, 8-12
mle-js-encodings, 3-11	finding in collections, 8-17
mle-js-fetch, 3-11	inserting into collections, 8-14
mle-js-oracledb, 3-11	removing from a collection, 8-24
mle-js-plsql-ffi, 3-11	replacing in collections, 8-22
mle-js-plsqltypes, 3-11	saving into collections, 8-15
	DRCP (database resident connection pool), 2-3
C	dropping a collection, 8-11
<u> </u>	dynamic execution, 2-5, 4-1
call specification, 2-6, 6-1, 6-12	workflow, 4-2
creating, 6-1	
elements of, 6-4	E
collections	FOLIA Carint
creating, 8-8	ECMAScript
dropping, 8-11	available features, 7-1
opening, 8-9	execution context, 2-8
during creation, 8-8	standard, 2-2, 2-4, 3-6
committing operations (transactions), 8-29	environment, 3-1
creating a collection, 8-8	execution context, 2-5, 2-8, 10-5
creating documents, 8-12	_
	F
D	FFI (Foreign Function Interface), 7-38
	finding documents in collections, 8-17
Data Guard, 3-1	Foreign Function Interface, 7-38
data guide for a collection, getting, 8-27	Toroign Function interface, 7 co
DBMS_MLE, 2-5	0
EVAL procedure	G
arguments of, 2-5	global variables, <i>6-11</i>
DBMS_MLE PL/SQL package, 4-1	giosai variasios, o II
debugging See post-execution debugging	1.1
debugpoints, 2-10	Н
elements of, 9-2	handling transactions, 8-29
5.56116 61, 6 2	nanding transactions, 0-23

debugpoints (continued)

indexing documents in a collection, 8-25	methods (continued) replaceOne(), 8-15, 8-22 replaceOneAndGet(), 8-15, 8-22 reset_package(), 10-5
initialization parameters  MAX_STRING_SIZE, 2-3  MLE_PROG_LANGUAGES, 10-5	save(), <i>8-15</i> saveAndGet(), <i>8-15</i> skip(), <i>8-15</i> , <i>8-17</i>
inline call specification, 6-1, 6-12 creating, 6-7 elements of, 6-10	terminal and nonterminal, 8-15 version(), 8-15, 8-17 MLE, 2-1–2-3
inserting documents into collections, 8-14	call specification, 6-1 environment, 3-1 inline call specification, 6-1
JavaScript, 2-2 global variables, 6-11 implementation of, 2-4 invoking, 2-5 loading from files, 4-3 providing inline, 4-2	module, 3-3, 5-1 See also module  MLE JavaScript SQL driver, 3-11, 7-1 selecting data, 7-6  MLE LANGUAGE clause, 6-7  MLE_PROG_LANGUAGES initialization parameter, 10-5  mle-js-fetch, 2-4
L	mle-js-oracledb See MLE JavaScript SQL driver
language options, 3-18 js.console, 3-19 js.polyglot-builtin, 3-19 js.strict, 3-19	module, 3-3 creating, 3-4 importing, 3-6, 5-1 managing, 3-3 naming, 3-3 module call, 2-6
M	Multilingual Engine See MLE
MAX_STRING_SIZE initialization parameter, 2-3 methods count(), 8-15, 8-17	N
create_context(), 10-8 createCollection(), 8-8 createIndex(), 8-25 drop(), 8-11 dropIndex(), 8-25	node package manager, 2-2 nonterminal method definition, 8-17 NPM (node package manager), 2-2
eval(), 2-5 execute(), 7-3	0
filter(), 8-15, 8-17 find(), 8-17 getCollectionNames(), 8-10 getContentAsString, 8-27 getCursor(), 8-15, 8-17 getDataGuide, 8-27 getOne(), 8-15, 8-17	opening a collection during creation, 8-8 opening existing collections, 8-9 ORA_SECURECONFIG audit policy, 10-10
hasNext(), 8-17 headerOnly(), 8-15, 8-17 key(), 8-15, 8-17 keys(), 8-15, 8-17 limit(), 8-15, 8-17 openCollection(), 8-9 read and write, 8-15 remove(), 8-15, 8-24	post-execution debugging, 2-10, 9-2 privileges, 2-4, 10-8 ALTER ANY MLE, 10-3 COLLECT DEBUG INFO, 10-4 CREATE ANY MLE, 10-3 CREATE ANY PROCEDURE, 10-3 CREATE MLE, 10-3 CREATE PROCEDURE, 10-3

privileges (continued)  DB_DEVELOPER_ROLE, 10-3  DROP ANY MLE, 10-3  EXECUTE DYNAMIC MLE, 10-2  EXECUTE ON JAVASCRIPT, 10-2  INHERIT PRIVILEGES, 10-13  SODA_APP, 10-2  PURE keyword, 2-9	Smart-DB approach, 2-2 SODA, 8-1 software bill of material (SBOM), 10-14
	terminal method definition, 8-17 transaction handling, 8-29
R	
read methods, 8-15	U
removing documents from a collection, 8-24 replacing documents in collections, 8-22 restricted execution context, 2-9, 10-5 ResultSet object, 7-3, 7-6	Unicode Standard, 3-5 USER_MLE_ENV_IMPORTS view, 3-21 USER_MLE_ENVS view, 3-21 USER_MLE_MODULES view, 3-13 USER_SOURCE view, 3-12
S	<del>-</del>
saving documents into collections, <i>8-15</i> SBOM, <i>10-14</i> Simple Oracle Document Access (SODA), <i>8-1</i> single-byte character set, <i>3-5</i>	W
	write methods, 8-15
