Part VII

Oracle Tools that Support Oracle XML DB

You can use various Oracle tools with Oracle XML DB. These include tools for managing Oracle XML DB, loading XML data, and exchanging XML data.

- Administration of Oracle XML DB
  Administration of Oracle XML DB includes installing, upgrading, and configuring it.

- How to Load XML Data
  The main way to load XML data into Oracle XML DB is to use SQL*Loader.

- Export and Import of Oracle XML DB Data
  You can use Oracle Data Pump to export and import `XMLType` tables for use with Oracle XML DB.

- XML Data Exchange Using Oracle Database Advanced Queuing
  You can exchange XML data using Oracle Database Advanced Queuing (AQ), which provides database-integrated message-queuing. AQ enables and manages asynchronous communication between applications, using messages. It supports point-to-point and publish/subscribe communication models.
